I BASIC CORPORATE INFORMATION

Hubei Sanonda CO., Ltd (the "Company") is a company limited by shares established in China with its head office located in Hubei Jingzhou.

During July 2017 a major assets restructuring was successfully completed, with the acquisition of Adama Agricultural Solutions Ltd (hereinafter: "Solutions"), a wholly-owned subsidiary of China National Agrochemical Corporation Limited (hereinafter: "CNAC").

On July 4, 2017 the entire share capital of Solutions was transferred from CNAC to the Company, in return for the issuance of 1,810,883,039 new shares of the Company to CNAC and their registration for trade on the Shenzhen Stock Exchange (which was completed on August 2, 2017).

Following the completion of the major assets restructuring, Solutions became a wholly owned subsidiary of the Company. The combination was considered as a business combination under common control.

The Company's parent company is CNAC, and the ultimate holding company is China National Chemical Corporation (hereinafter - "ChemChina").

On December 2017, a non-publicly offered 104,697,982 ordinary shares (A-share) at nominal value of RMB 1 per share to the specific investors. On December 27th, 2017, the Company received proceeds of 1,531,920 thousand RMB, net of the issuing cost of 28,080 thousand RMB. The listing date of the newly-issued 104,697,982 shares was January 17, 2018.

The principal activities of the Company and its subsidiaries (together referred to as the "Group") are engaged in development, manufacturing and marketing of agrochemicals, intermediate materials for other industries, food additives and synthetic aromatic products, mainly for export. For information about the subsidiaries of the Company, refer to Note VII.

The Company's and consolidated financial statements had been approved by the Board of Directors of the Company on August 27, 2018.

Details of the scope of consolidated financial statements are set out in Note VII "Interest in other entities", whereas the changes of the scope of consolidation are set out in Note VI "Changes of the scope of consolidation".

cninf 巨潮资讯 www.cninfo.com.cn

II BASIS OF PREPARATION

1. Basis of preparation

The Group has adopted the Accounting Standards for Business Enterprises issued by the Ministry of Finance (the "MoF"). In addition, the Group has disclosed relevant financial information in these financial statements in accordance with Information Disclosure and Presentation Rules for Companies Offering Securities to the Public No. 15－General Provisions on Financial Reporting (revised by China Securities Regulatory Commission (hereinafter "CSRC") in 2014).

2. Accrual basis and measurement principle

The Group has adopted the accrual basis of accounting. Except for certain financial instruments which are measured at fair value, deferred tax assets and liabilities, assets and liabilities relating to employee benefits, provisions and investments in associated companies and joint ventures, the Group adopts the historical cost as the principle of measurement in the financial statements. Where assets are impaired, provisions for asset impairment are made in accordance with relevant requirements.

In the historical cost measurement, assets obtained shall be measured at the amount of cash or cash equivalents or fair value of the consideration paid. Liabilities shall be measured at the actual amount of cash or assets received, or the contractual amount in a present obligation, or the prospective amount of cash or cash equivalents paid to discharge the liabilities.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing market participants in an arm's length transaction at the measurement date. Fair value measured and disclosed in the financial statements are determined on this basis whether it is observable or estimated by valuation techniques.

The following table provides an analysis, grouped into Levels 1 to 3 based on the degree to which the fair value input is observable and significant to the fair value measurement as a whole:

Level 1 - based on quoted prices (unadjusted) in active markets;

Level 2 - based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly;

Level 3 - based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

3. Going concern

The financial statements have been prepared on the going concern basis.

The Group has performed an assessment of the going concern for the following 12 month from 30 June 2018 and have not identified any significant doubtful matter or event on the going concern, as such the financial statement have been prepared on the going concern basis.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES

1. Statement of compliance

These financial statements are in compliance with the Accounting Standards for Business Enterprises to truly and completely reflect consolidated and the Company's financial position as at 30 June 2018 and consolidated and the Company's operating results and cash flows for the six months then ended.

2. Accounting period

The Group has adopted the calendar year as its accounting year, i.e. from 1 January to 31 December.

3. Business cycle

The company takes the period from the acquisition of assets for processing to their realisation in cash or cash equivalents as a normal operating cycle. The operating cycle for the company is 12 months.

4. Reporting currency

The Company and its domestic subsidiaries choose Renminbi (hereinafter "RMB") as their functional currency. Functional currencies of overseas subsidiaries are determined on the basis of the principal economic environment in which the overseas subsidiaries operate. The functional currency of the overseas subsidiaries is mainly the United States Dollar (hereinafter "USD"). The presentation currency of these financial statements is Renminbi.

5. Business combinations

(1) Business combinations involving enterprises under common control

A business combination involving enterprises under common control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or parties both before and after the combination, and that control is not transitory. Assets and liabilities obtained shall be measured at their respective carrying amounts as recorded by the combining entities at the date of the combination. The difference between the carrying amount of the net assets obtained and the carrying amount of the consideration paid for the combination is adjusted to the share premium in capital reserve. If the share premium is not sufficient to absorb the difference, any excess shall be adjusted against retained earnings. Costs that are directly attributable to the combination are charged to profit or loss in the period in which they are incurred.

During July 2017 a major assets restructuring was successfully completed, with the acquisition of Solutions, a wholly-owned subsidiary of CNAC. On July 4, 2017 the entire share capital of Solutions was transferred from CNAC to the Company, in return for the issuance of 1,810,883,039 new shares of the Company to CNAC and their registration for trade on the Shenzhen Stock Exchange which was completed on August 2, 2017.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

5. Business combination (cont'd)

Following the completion of the major assets restructuring, Solutions became a wholly owned subsidiary of the Company. The combination was considered as a business combination under common control. Therefore, the comparative financial information for the six month ended June 30, 2017 was restated so that the profit or loss, cash flow and equity movement, notes and additional information, includes the information of the consolidated information, in accordance with the Accounting Standards for Business Enterprises.

(2) Business combinations not involving enterprises under common control and goodwill.

A business combination not involving enterprises under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties before and after the combination.

The costs of business combination are the fair value of the assets paid, liabilities incurred or assumed and equity instruments issued by the acquirer for the purpose of achieving the control rights over the acquiree.

The intermediary costs such as audit, legal services and assessment consulting costs and other related management costs that are directly attributable to the combination by the acquirer are charged to profit or loss in the period in which they are incurred. Direct capital issuance costs incurred in respect of equity instruments or liabilities issued pursuant to the business combination should be charged to the respect equity instruments or liabilities upon initial recognition of the underlying equity instruments or liabilities.

The acquiree's identifiable assets, liabilities and contingent liabilities acquired by the acquirer in a business combination, that meet the recognition criteria shall be measured at fair value at the acquisition date. Where the cost of combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is treated as an asset and recognized as goodwill, which is measured at cost on initial recognition. Where the cost of combination is less than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the remaining difference is recognized immediately in profit or loss for the current year.

The goodwill raised because of the business combination should be separately disclosed in the consolidated financial statement and measured by the initial amount less any accumulative impairment provision.

6. Basis for preparation of consolidated financial statements

The scope of consolidation in consolidated financial statements is determined on the basis of control. Control is achieved when the Company has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns.

For a subsidiary disposed of by the Group, the operating results and cash flows before the date of disposal (the date when control is lost) are included in consolidated income statement and consolidated statement of cash flows.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

6. Basis for preparation of consolidated financial statements (cont'd)

For a subsidiary acquired through a business combination not involving enterprises under common control, the operating results and cash flows from the acquisition date (the date when control is obtained) are included in consolidated income statement and consolidated statement of cash flows.

For a subsidiary acquired through a business combination involving enterprises under common control, it will be fully consolidated into consolidated financial statements from the date on which the subsidiary was ultimately under common control by the same party or parties.

The significant accounting policies and accounting years adopted by the subsidiaries are determined based on the uniform accounting policies and accounting years set out by the Company. For those subsidiaries acquired through business combinations not involving enterprises under common control, the identifiable assets and liabilities recorded in the financial statements of the acquired subsidiaries should be adjusted based on the fair value determined at the acquisition date.

All significant intra-group balances, transactions and unrealized profits are eliminated on consolidation.

The portion of subsidiaries' equity that is not attributable to the Company is treated as non-controlling interests and presented as "non-controlling interests" in the shareholders' equity in consolidated balance sheet. The portion of net profits or losses of subsidiaries for the period attributable to non-controlling interests is presented as "non-controlling interests" in consolidated income statement below the "net profit" line item. Total comprehensive income attributable to non-controlling shareholders is presented separately in the consolidated income statement below the total comprehensive income line item.

When the amount of loss for the period attributable to the non-controlling shareholders of a subsidiary exceeds the non-controlling shareholders' portion of the opening balance of owners' equity of the subsidiary, the excess amount is still allocated against non-controlling interests.Acquisition of non-controlling interests or disposal of equity interest in a subsidiary that does not result in the loss of control over the subsidiary is accounted for as equity transactions. The carrying amounts of the Company's interests and non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is adjusted to capital reserve under owners' equity. If the capital reserve is not sufficient to absorb the difference, the excess is adjusted against retained earnings. Other comprehensive income attributed to the non-controlling interest is reattributed to the shareholders of the company.

A put option issued by the Group to holders of non-controlling interests that is settled in cash or other financial instrument is recognized as a liability at the present value of the exercise price. The Group's share of a subsidiary's profits includes the share of the holders of the non-controlling interests to which the Group issued a put option.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

6. Basis for preparation of consolidated financial statements (cont'd)

When the Group loses control over a subsidiary due to disposal of certain equity interest or other reasons, any retained interest is re-measured at its fair value at the date when control is lost. The difference between (i) the aggregate of the consideration received on disposal and the fair value of any retained interest and (ii) the share of the former subsidiary's net assets cumulatively calculated from the acquisition date according to the original proportion of ownership interest is recognized as investment income in the period in which control is lost. Other comprehensive income associated with the disposed subsidiary is reclassified to investment income in the period in which control is lost.

7. Classification and accounting methods of joint arrangement

Joint arrangement involves by two or more parties jointly control. Joint control is the contractually agreed sharing of control over an economic activity, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the ventures).

The Group makes the classification of the joint arrangements according to the rights and obligations in the joint arrangements to either joint operations or joint ventures.
A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint ventures are accounted for using the equity method.

8. Cash and cash equivalents

Cash comprises cash on hand and deposits that can be readily withdrawn on demand. Cash equivalents are the Group's short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

9. Translation of transactions and financial statements denominated in foreign currencies

(1) Transactions denominated in foreign currencies

On initial recognition, foreign currency transactions are translated into functional currency using the spot exchange rate prevailing at the date of transaction.

At the balance sheet date, foreign currency monetary items are translated into functional currency using the spot exchange rates at the balance sheet date. Exchange differences arising from the differences between the spot exchange rates prevailing at the balance sheet date and those on initial recognition or at the previous balance sheet date are recognized in profit or loss for the period, except that (i) exchange differences related to a specific-purpose borrowing denominated in foreign currency that qualify for capitalization are capitalized as part of the cost of the qualifying asset during the capitalization period. (ii) exchange differences related to hedging instruments for the purpose of hedging against foreign currency risks are accounted for using hedge accounting.

When preparing financial statements involving foreign operations, if there is any foreign currency monetary items which in substance forms part of the net investment in the foreign operations, exchange differences arising from the changes of foreign currency should be recorded as other comprehensive income, and will be reclassified to profit or loss upon disposal of the foreign operations.

cninf 巨潮资讯 www.cninfo.com.cn

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

9. Translation of transactions and financial statements denominated in foreign currencies (cont'd)

(1) Transactions denominated in foreign currencies (cont'd)

Foreign currency non-monetary items measured at historical cost are translated to the amounts in functional currency at the spot exchange rates on the dates of the transactions and the amounts in functional currency remain unchanged.

(2) Translation of financial statements denominated in foreign currency

For the purpose of preparing consolidated financial statements, financial statements of a foreign operation are translated from the foreign currency into RMB using the following method: assets and liabilities on the balance sheet are translated at the spot exchange rate prevailing at the balance sheet date; shareholders' equity items except for retained earnings are translated at the spot exchange rates at the dates on which such items arose; all items in the income statement as well as items reflecting the distribution of profits are translated at average rate or at the spot exchange rates on the dates of the transactions; the opening balance of retained earnings is the translated closing balance of the previous year's retained earnings; the closing balance of retained earnings is calculated and presented on the basis of each translated income statement and profit distribution item. The difference between the translated assets and the aggregate of liabilities and shareholders' equity items is recorded as other comprehensive income. Cash Flows arising from transaction in foreign currency and the cash flows of a foreign subsidiary are translated at the spot exchange rate on the date of the cash flow, the effect of exchange rate changes on the cash and cash equivalents is regarded as a reconciling item and present separately in the statement "effect of foreign exchange rate changes on the cash and cash equivalents".

The opening balances and the comparative figures of prior year are presented at the translated amounts in the prior year's financial statements.

On disposal of the Group's entire equity interest in a foreign operation, or upon a loss of control over a foreign operation due to disposal of certain equity interest in it or other reasons, the Group transfers the accumulated translation differences, which are attributable to the owners' equity of the Company and presented under other comprehensive income to profit or loss in the period in which the disposal occurs.

In case of a disposal or other reason that does not result in the Group losing control over a foreign operation, the proportionate share of accumulated translation differences are re-attributed to non-controlling interests and are not recognized in profit and loss. For partial disposals of equity interest in foreign operations which are associates or joint ventures, the proportionate share of the accumulated translation differences are reclassified to profit or loss.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments

The Group recognises a financial asset or a financial liability when it becomes a party to the contractual provisions of the instrument. At initial recognition, the Group measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. At initial recognition, an entity shall measure trade receivables at their transaction price if the trade receivables do not contain a significant financing component.

10.1 Classification and measurement of financial assets

After initial recognition, an entity shall measure a financial asset at: (a) amortised cost; (b) fair value through other comprehensive income ("FVTOCI"); or (c) fair value through profit or loss ("FVTPL").

10.1.1 Financial assets at amortised cost

A financial asset is measured at amortised cost if both of the following conditions are met:
(a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortised cost, using effective interest method. Gains or losses upon impairment and derecognition are recignised in profit or loss.

10.1.1.1 Effective interest method and amortised cost

Effective interest method represents the method for calculating the amortized costs and interest income or expense of each period in accordance with the effective interest rate of financial assets or financial liabilities (inclusive of a set of financial assets or financial liabilities). Effective interest rate represents the rate that discounts the future cash flow over the expected subsisting period or shorter period, if appropriate, of the financial asset or financial liability to the current carrying value of such financial asset or financial liability.

When calculating the effective interest rate, the Group will consider the anticipated future cash flow (not considering the future credit loss) on the basis of all contract clauses of financial assets or financial liabilities, as well as consider all kinds of charges, transaction fees and discount or premium paid forming an integral part of the effective interest rate paid or received between both parties of financial asset or financial liability contract.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments (cont'd)

10.1 Classification and measurement of financial assets (cont'd)

10.1.2 Financial assets at FVTPL

Financial assets at FVTPL are either those that are classified as financial assets at FVTPL or designated as financial assets at FVTPL.

A financial asset is measured at FVTPL unless it is measured at amortised cost or at FVTOCI.

The Group may, at initial recognition, irrevocably designate a financial asset as measured at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

A gain or loss on a financial asset that is measured at FVTPL is recognised in profit or loss unless it is part of a hedging relationship. Dividends are recognised in profit or loss.

10.1.3 Designated financial assets at FVTOCI

At initial recognition, the Group can makes an irrevocable election to designate to FVTOCI an investment in an equity instrument that is held for trading.

With the designation, a gain or loss from the financial asset is recognised in other comprehensive income. When the financial asset is derecognised the cumulative gain or loss previously recognised in other comprehensive income, is reclassified to retained earnings.

10.2 Impairment of financial assets

The Group recognises a loss allowance for expected credit losses on a financial asset that is measured at amortised cost.

The Group always measures the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not contain a significant financing component.

For financial assets other than trade receivables, the Group measure the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses or lifetime expected credit losses. At each balance sheet date, if the credit risk on that financial instrument has increased significantly since initial recognition, the Group measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses. The Group recognises in profit or loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance to the amount that is required to be recognized.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments (cont'd)

10.2 Impairment of financial assets (cont'd)

10.2.1 Significant increases in credit risk

At each balance sheet date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition.

The Group mainly considers the following list of information in assessing changes in credit risk:

(a) significant changes in internal price indicators of credit risk as a result of a change in credit risk since inception.
(b) significant changes in external market indicators of credit risk for a particular financial instrument or similar financial instruments with the same expected life.
(c) a significant change in the debtors's ability to meet its debt obligations.
(d) an actual or expected significant change in the operating results of the receivable.
(e) significant increases in credit risk on other financial instruments of the same debtor.
(f) an actual or expected significant adverse change in the regulatory, economic, or technological environment of the receivable.
(g) significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements, which are expected to reduce the debtor's economic incentive to make scheduled contractual payments or to otherwise have an effect on the probability of a default occurring.
(h) significant changes that are expected to reduce the receivable's economic incentive to make scheduled contractual payments.
(i) significant changes in the expected performance and behaviour of the receivable.
(j) past due information.

The Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

10.2.2 Credit-impaired financial asset

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

(a) significant financial difficulty of the issuer or the receivable;
(b) a breach of contract, such as a default or past due event;
(c) the lender(s) of the receivable, for economic or contractual reasons relating to the receivable's financial difficulty, having granted to the receivable a concession(s) that the lender(s) would not otherwise consider;
(d) it is becoming probable that the receivable will enter bankruptcy or other financial reorganisation;

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments (cont'd)

10.2 Impairment of financial assets (cont'd)

10.2.3 Recognition of expected credit losses

For the purpose of determining significant increases in credit risk and recognising a loss allowance on a collective basis, financial instruments are grouped on the basis of shared credit risk. Examples of shared credit risk characteristics may include, but are not limited to, the:
(a) instrument type; (b) credit risk ratings; (c) collateral type; (d) industry; (e) geographical location of the debtor; and (f) the value of collateral relative to the financial asset if it has an impact on the probability of a default occurring.

Expected credit losses of financial instruemnts are determined as the present value of the difference between: (a) the contractual cash flows that are due to an entity under the contract; and (b) the cash flows that the entity expects to receive.

For a financial asset that is credit-impaired at the reporting date, an entity shall measure the expected credit losses as the difference between the asset's gross carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. Any adjustment is recognised in profit or loss as an impairment gain or loss.

The Group measures expected credit losses of a financial instrument in a way that reflects:
(a) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
(b) the time value of money; and
(c) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

10.2.4 Written-off of financial assets

The Group directly reduces the gross carrying amount of a financial asset when the entity has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. A write-off constitutes a derecognition event.

10.3 Transfer of financial asset

The Group derecognizes a financial asset if one of the following conditions is satisfied: (i) the contractual rights to the cash flows from the financial asset expire; or (ii) the financial asset has been transferred and substantially all the risks and rewards of ownership of the financial asset is transferred to the transferee; or (iii) although the financial asset has been transferred, the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset but has not retained control of the financial asset.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments (cont'd)

10.3 Transfer of financial asset (cont'd)

If the Group neither transfers nor retains substantially all the risks and rewards of ownership of a financial asset, and it retains control of the financial asset, it recognizes the financial asset to the extent of its continuing involvement in the transferred financial asset and recognizes an associated liability. The extent of the Group's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset.

When the company is dercognizing a financial asset in its entirety, except for equity instrument designated to FVTOCI, the difference between (i) the carrying amount of the financial asset transferred; and (ii) the sum of the consideration received from the transfer is recognized in profit or loss.

10.4 Classification and measurement of financial liabilities

Based on the economic substance rather than the form of legal contracts, along with the definition of financial liabilities and equity instruments, the Group shall classify the financial instruments or its components as financial liability or equity instrument at initial recognition.

On initial recognition, financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Other financial liabilities are subsequently measured at amortized cost by using effective interest method. Gain or loss arising from derecognition or amortization is recognized in current profit or loss.

10.5 Derecognition of financial liabilities

Financial liabilities are derecognized in full or in part only when the present obligation is discharged in full or in part. An agreement entered into force between the Group (debtor) and a creditor to replace the original financial liabilities with new financial liabilities with substantially different terms, derecognize the original financial liabilities as well as recognize the new financial liabilities. When financial liabilities is derecognized in full or in part, the difference between the carrying amount of the financial liabilities derecognized and the consideration paid (including transferred non-cash assets or new financial liability) is recognized in profit or loss for the current period.

10.6 Derivatives

Derivative financial instruments include forward exchange contracts, currency swaps and foreign exchange options, etc. Derivatives are initially measured at fair value at the date when the derivative contracts are entered into and are subsequently re-measured at fair value. The resulting gain or loss is recognized in profit or loss unless the derivative is designated and highly effective as a hedging instrument, in which case the timing of the recognition in profit or loss depends on the nature of the hedge relationship (Note III 29).

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

10. Financial instruments (cont'd)

10.7 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities shall be presented separately in the balance sheet and shall not be offset, except for circumstances where the Group has a legal right that is currently enforceable to offset the recognized financial assets and financial liabilities, and intends either to settle on a net basis, or to realize the financial asset and settle the financial liability simultaneously, a financial asset and a financial liability shall be offset and the net amount is presented in the balance sheet.

10.8 Equity instruments

The consideration received from the issuance of equity instruments net of transaction costs is recognised in shareholders' equity. Consideration and transaction costs paid by the Company for repurchasing self-issued equity instruments are deducted from shareholders' equity.

When the Company repurchases its own shares, those shares are treated as treasury shares. All expenditures relating to the repurchase are recorded in the cost of the treasury shares, with the transaction entering into the share capital. Treasury shares are excluded from profit distributions and are stated as a deduction under shareholders' equity in the balance sheet.

11. Receivables

Receivables are assessed for impairment on an individual basis and/or on a collective group basis as follows:

Lifetime or 12-month expected credit losses in respect of a receivable is calculated based on the assessment of whether the credit risk on a receivable has increased significantly since initial recognition. Impairment losses are recognised in profit or loss. For account receivables, the Group always measure the loss allowance at an amount equal to lifetime expected credit losses.

(1) Receivables individually significant for which provision for impairment is assessed individually

Basis or monetary criteria for determining an individually significant receivable	A receivable with an amount greater than RMB 125 million
Method of provisioning for bad and doubtful debts for receivables that are assessed individually	Determined mostly according to familiarity with the customer, its quality and the collateral amount the customer provides.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

11. Receivables (cont'd)

(2) Receivables for which provision for impairment is assessed collectively

The assessment is made collectively for account receivables, where receivables share similar credit risk characteristics based on geographical location, using the expected credit losses model including inter-alia aging analysis, historical loss experiences adjusted by the observable factors reflecting current and expected future economic conditions.

The ratio of the collective provision for non-overdue account receivables is between 0%-5%.

For overdue account receivables, the expected credit losses assessment is as follows:

Aging	Ratio of the provision for accounts receivable (%)
Overdue up to 60 days	3-5
Overdue between 60 and 180 days	10
Overdue more than 180 days	40
Legal	100

(3) Other individually not significant receivables but individually tested for impairment:

Reasons for making individual bad debt provision	There is objective evidence to demonstrate that the Group is not able to fully recover the receivables according to the original terms and conditions of the receivables.
Method of provisioning for bad and doubtful debts for receivables that are assessed individually	Determined mostly according to familiarity with the customer, its quality and the collateral amount the customer provides.

12. Inventories

(1) Categories of inventories and initial measurement

The Group's inventories mainly include raw materials, work in progress, semi-finished goods, finished goods and reusable materials. Reusable materials include low-value consumables, packaging materials and other materials, which can be used repeatedly but do not meet the definition of fixed assets.

Inventories are initially measured at cost. Cost of inventories comprises all costs of purchase, costs of conversion and other expenditures incurred in bringing the inventories to their present location and condition including direct labor costs and an appropriate allocation of production overheads.

(2) Valuation method of inventories upon delivery

The actual cost of inventories upon delivery is calculated using the weighted average method.

(3) Basis for determining net realizable value of inventories and provision methods for decline in value of inventories

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

12. Inventories (cont'd)

At the balance sheet date, inventories are measured at the lower of cost and net realizable value. If the net realizable value is below the cost of inventories, a provision for decline in value of inventories is made. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion, the estimated costs necessary to make the sale and relevant taxes.

After the provision for decline in value of inventories is made, if the circumstances that previously caused inventories to be written down below cost no longer exist so that the net realizable value of inventories is higher than their carrying amount, the original provision for decline in value is reversed and the reversal is included in profit or loss for the period.

(4) The perpetual inventory system is maintained for stock system.

13. Assets held for Sale

When the Group realizes the carrying value of a non-current asset or a disposal group through sale instead of continuing operation, such asset is classified as an asset held for sale.

All the following conditions should be met for the non-current asset or disposal group to be classified as held for sale: (1) ready to be sold in current condition, based on similar transactions or common practices; (2) the sale is more than likely to happen, i.e. the Group has approved the sale in a resolution and obtained a certain purchase commitment, and the sale will be closed within one year.

The Group measures the assets held for sales at the lower of book value and fair value less the cost of the sale. If the carrying value is higher than the fair value less the cost of the sale, the difference is recognized as asset impairment loss. If the fair value of the asset held for sale recovered subsequent to the balance sheet date, the recovery is recognized, limited to the original carrying amount of the asset, and relevant asset impairment loss is reversed.

Asset held for sale is not depreciated or amortized.

14. Long-term equity investments

Long-term equity investments include investments in subsidiaries, joint ventures and associates.

Subsidiaries are the companies that are controlled by the Company. Associates are the companies over which the Group has significant influence. Joint ventures are joint arrangements over which the Group has joint control along with other investors and has rights to the net assets of the joint arrangement.

The Company accounts for the investment in subsidiaries at historical cost in the Company's financial statements. Investments in associates and joint ventures are accounted for under equity method.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

14. Long-term equity investments (cont'd)

(1) Determination of investment cost

For a long-term equity investment acquired through a business combination involving enterprises under common control, the investment cost of the long-term equity investment is the share of the carrying amount of the shareholders' equity of the acquiree attributable to the ultimate controlling party at the date of combination. For a long-term equity investment acquired through business combination not involving enterprises under common control, the investment cost of the long-term equity investment is the cost of acquisition. For a business combination not involving enterprises under common control achieved in stages that involves multiple exchange transactions, the initial investment cost is carried at the aggregate of the carrying amount of the acquirer's previously held equity interest in the acquiree and the new investment cost incurred on the acquisition date.

Regarding the long-term equity investment acquired otherwise than through a business combination, if the long-term equity investment is acquired by cash, the historical cost is determined based on the amount of cash paid and payable; if the long-term equity investment is acquired through the issuance of equity instruments, the historical cost is determined based on the fair value of the equity instruments issued.

(2) Subsequent measurement and recognition of profit or loss

If the long-term equity investment is accounted for at cost, it should be measured at historical cost less accumulated impairment losses. Dividend declared by the investee should be accounted for as investment income.

Under the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, no adjustment is made to the initial investment cost. Where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the difference is recognized in profit or loss for the period, and the cost of the long-term equity investment is adjusted accordingly.

Under the equity method, the Group recognizes its share of the net profit or loss and other comprehensive income of the investee for the period as investment income or loss and other comprehensive income for the period. The Group recognizes its share of the investee's net profit or loss based on the fair value of the investee's individual separately identifiable assets, etc. at the acquisition date after making appropriate adjustments to be confirmed with the Group's accounting policies and accounting period. The Group discontinues recognizing its share of net losses of the investee after the carrying amount of the long-term equity investment together with any long-term interests that in substance form part of its net investment in the investee is reduced to zero. If the Group has incurred obligations to assume additional losses of the investee, a provision is recognized according to the expected obligation, and recorded as investment loss for the period.

(3) Basis for determining control, joint control and significant influence over investee

cninf 巨潮资讯 www.cninfo.com.cn

Control is achieved when the Company has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

14. Long-term equity investments (cont'd)

(3) Basis for determining control, joint control and significant influence over investee (cont'd)

Joint control is the contractually agreed sharing of control over an economic activity, and exists only when the strategic financial and operating policy decisions relating to the activity require the unanimous consent of the parties sharing control.

Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

When determining whether an investing enterprise is able to exercise control or significant influence over an investee, the effect of potential voting rights of the investee (for example, warrants and convertible debts) held by the investing enterprises or other parties that are currently exercisable or convertible shall be considered.

(4) Methods of impairment assessment and determining the provision for impairment loss

If the recoverable amounts of the investments to subsidiaries, joint ventures and associates are less than their carrying amounts, an impairment loss should be recognized to reduce the carrying amounts to the recoverable amounts (Note III 21).

(5) The disposal of long-term equity investment

On disposal of a long term equity investment, the difference between the proceeds actually received and receivable and the carrying amount is recognized in profit or loss for the period.

15. Investment properties

Investment property refers to real estate held to earn rentals or for capital appreciation, or both, including leased land use rights, land use rights held and provided for transferring after appreciation and leased constructions, etc.

Investment property is initially measured at cost. Subsequent expenditures related to an investment property shall be included in cost of investment property only when the economic benefits associated with the asset will likely flow to the Group and its cost can be measured reliably. All other subsequent expenditures on investment property shall be included in profit or loss for the current period when incurred.

The Group adopts cost method for subsequent measurement of investment property, which is depreciated or amortized using the same policy as that for buildings and land use rights.

When an investment property is sold, transferred, retired or damaged, the amount of proceeds on disposal of the property net of the carrying amount and related taxes and surcharges is recognized in profit or loss for the current period.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

16. Fixed assets

(1) Recognition criteria for fixed assets

Fixed assets include buildings and structures, machinery and equipment, transportation vehicles, office equipment and others.

Fixed assets are tangible assets that are held for use in the production or supply of goods or for administrative purposes, and have useful lives of more than one accounting year. A fixed asset is recognized only when it is probable that economic benefits associated with the asset will flow to the Group and the cost of the asset can be reliably measured. Purchased or constructed fixed assets are initially measured at cost.

Subsequent expenditures incurred for the fixed asset are included in the cost of the fixed asset and if it is probable that economic benefits associated with the asset will flow to the Group and the subsequent expenditures can be measured reliably. Other subsequent expenditures are recognized in profit or loss in the period in which they are incurred.

(2) Depreciation of each category of fixed assets

Fixed asset is depreciated based on the cost of the fixed asset recognized less expected net residual value over its useful life using the straight-line method since the month subsequent to the one in which it is ready for intended use. Depreciation is calculated based on the carrying amount of the fixed asset after impairment over the estimated remaining useful life of the asset.

The Group reviews the useful life and estimated net residual value of a fixed asset and the depreciation method applied at least once at each financial year-end, and account for any change as a change in an accounting estimate.

The estimated useful life, estimated net residual value and annual depreciation rate of each category of fixed assets are as follows:

Category	Depreciation	Useful life (years)	Residual value (%)	Annual depreciation rate (%)
Buildings	the straight-line method	15-50	0-4	1.9-6.7
Machinery and equipment	the straight-line method	3-22	0-4	4.4-33.3
Office and other equipment	the straight-line method	3-17	0-4	5.6-33.3
Motor vehicles	the straight-line method	5-9	0-2	10.9-20.0

(3) Other explanations

If a fixed asset is upon disposal or no future economic benefits are expected to be generated from its use or disposal, the fixed asset is derecognized. When a fixed asset is sold, transferred, retired or damaged, the amount of any proceeds on disposal of the asset net of the carrying amount and related taxes is recognized in profit or loss for the period.

cninf 巨潮资讯 www.cninfo.com.cn

The difference between recoverable amounts of the fixed assets under the carrying amount is referred to as impairment loss (Note III 21).

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

17. Construction in progress

Construction in progress is measured at its actual costs. The actual costs include various construction, installation costs, borrowing costs capitalized and other expenditures incurred until such time as the relevant assets are completed and ready for its intended use. When the asset concerned is ready for its intended use, the cost of the asset is transferred to fixed assets and depreciated starting from the following month.

The difference between recoverable amounts of the construction in progress under the carrying amount is referred to as impairment loss (Note III 21).

18. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying asset are capitalized when expenditures for such asset and borrowing costs are incurred and activities relating to the acquisition, construction or production of the asset that are necessary to prepare the asset for its intended use or sale have commenced. Capitalization of borrowing costs ceases when the qualifying asset being acquired, constructed or produced becomes ready for its intended use or sale. Borrowing costs incurred subsequently should be charged to profit or loss. Capitalization of borrowing costs is suspended during periods in which the acquisition, construction or production of a qualifying asset is suspended abnormally and when the suspension is for a continuous period of more than 3 months. Capitalization is suspended until the acquisition, construction or production of the asset is resumed.

Where funds are borrowed under a specific-purpose borrowing, the amount of interest to be capitalized is the actual interest expenses incurred on that borrowing for the period less any bank interest earned from depositing the borrowed funds before being used on the asset or any investment income on the temporary investment of those funds.

Where funds are borrowed under general-purpose borrowings, the Group determines the amount of interest to be capitalized on such borrowings by applying a capitalization rate to the weighted average of the excess of cumulative expenditures on the asset over the amounts of specific-purpose borrowings. The capitalization rate is the weighted average of the interest rates applicable to the general-purpose borrowings.

During the capitalization period, exchange differences on foreign currency specific-purpose borrowing are fully capitalized whereas exchange differences on foreign currency general-purpose borrowing is charged to profit or loss.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

19. Intangible assets

(1) Valuation methods, service life, impairment test

The Group's intangible assets include product registration assets, Intangible assets upon purchase of products, marketing rights and rights to use trademarks, land use rights and software. Intangible assets are stated at the balance sheet at cost less accumulated amortization and impairment losses.

When an intangible asset with a finite useful life is available for use, its original cost less any accumulated impairment losses is amortized over its estimated useful life using the straight-line method. An intangible asset with an indefinite useful life is not amortized.

For an intangible asset with a finite useful life, the Group reviews the useful life and amortization method at the end of the year, and makes adjustments when necessary.

The respective amortization periods for such intangible assets are as follows:

Item	*Amortization period (years)*
Land use rights	49-50 years
Product registration	8 years
Intangible assets upon purchased products	1-20 years (Mainly 7-11, 20)
Marketing rights and Rights to use trademarks	4-10 years
Software	3-5 years

The difference between recoverable amounts of the intangible assets under the carrying amount is referred to as impairment loss (III 21).

(2) Research and development expenditure

Internal research and development project expenditures were classified into research expenditures and development expenditures depending on its nature and the greater uncertainty whether the research activities becoming to intangible assets.

Expenditure during the research phase is recognized as an expense in the period in which it is incurred. Expenditure during the development phase that meets all of the following conditions at the same time is recognized as intangible asset:

- It is technically feasible to complete the intangible asset so that it will be available for use or sale;
- The Group has the intention to complete the intangible asset and use or sell it;
- The Group can demonstrate the ways in which the intangible asset will generate economic benefits;
- The availability of adequate technical, financial and other resources to complete the development and the ability to use or sell the intangible asset;
- The expenditure attributable to the intangible asset during its development phase can be reliably measured.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

19. Intangible assets (cont'd)

(2) Research and development expenditure (cont'd)

Expenditures that do not meet all of the above conditions are recognized in profit or loss when incurred. If the expenditures cannot be distinguished between the research phase and development phase, the Group recognizes all of them in profit or loss for the period. Expenditures that have previously been recognized in the profit or loss would not be recognized as an asset in subsequent years. Those expenditures capitalized during the development stage are recognized as development costs incurred and will be transferred to intangible asset when the underlying project is ready for an intended use.

20. Goodwill

The initial cost of goodwill represents the excess of cost of acquisition over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under a business combination not involving enterprises under common control.

Goodwill is not amortised and is stated in the balance sheet at cost less accumulated impairment losses (see Note III 21). On disposal of an asset group or a set of asset groups, any attributable goodwill is written off and included in the calculation of the profit or loss on disposal.

21. Impairment of long-term assets

The Company assesses at each balance sheet date whether there is any indication that the fixed assets, construction in progress, intangible assets with finite useful lives, investment properties measured at historical cost, investments in subsidiaries, joint ventures and associates may be impaired. If there is any indication that such assets may be impaired, recoverable amounts are estimated for such assets. The recoverable amount of an asset is the higher of its fair value less costs to sell and the present value of the future cash flow estimated to be derived from the asset. The Group estimates the recoverable amount on an individual basis. If it is not possible to estimate the recoverable amount of the individual asset, the Group determines the recoverable amount of the asset group to which the asset belongs. Identification of an asset group is based on whether major cash inflows generated by the asset group are largely independent of the cash inflows from other assets or asset groups.

Goodwill arising from a business combination is tested for impairment at least at each year end, irrespective of whether there is any indication that the asset may be impaired. For the purpose of impairment testing, the carrying amount of goodwill acquired in a business combination is allocated from the acquisition date on a reasonable basis to each of the related asset groups; if it is impossible to allocate to the related asset groups, it is allocated to each of the related set of asset groups. Each of the related asset groups or set of asset groups is an asset group or set of asset group that is able to benefit from the synergies of the business combination and shall not be larger than a reportable segment determined by the Group. If the carrying amount of the asset group or set of asset groups is higher than its recoverable amount, the amount of the impairment loss first reduced by the carrying amount of the goodwill allocated to the asset group or set of asset groups, and then the carrying amount of other assets (other than the goodwill) within the asset group or set of asset groups, pro rata based on the carrying amount of each asset.

Once the impairment loss of such assets is recognized, it will not be reversed in subsequent periods.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

22. Employee benefits

(1) Short-term employee benefits

Employee wages or salaries, bonuses, social security contributions, measured on a non-discounted basis, and the expense is recorded when the related service is provided. A provision for short-term employee benefits in respect of cash bonuses is recognized in the amount expected to be paid where the Group has a current legal or constructive obligation to pay the said amount for services provided by the employee in the past and the amount can be estimated reliably.

(2) Post-employment benefits

Post-employment benefits are classified into defined contribution plans and defined benefit plans.

A defined contribution plan is a post-employment benefit plan under which the Group pays contributions to a separate entity and has no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognized as an expense in profit or loss in the periods during which related services are rendered by employees.

Defined benefit plans of the Group are post-employment benefit plans other than defined contribution plans. In accordance with the projected unit credit method, the Group measures the obligations under defined benefit plans using unbiased and mutually compatible actuarial assumptions to estimate related demographic variables and financial variables, and discount obligations under the defined benefit plans to determine the present value of the defined benefit liability. The discount rate used is the yield on the reporting date on highly-rated corporate debentures denominated in the same currency, that have maturity dates approximating the terms of the Group's obligation.

The Group attributes benefit obligations under a defined benefit plan to periods of service provided by respective employees. Service cost and interest expense on the defined benefit liability are charged to profit or loss and remeasurements of the defined benefit liability are recognised in other comprehensive income.

(3) Termination benefits

When the Group terminates the employment with employees or provides compensation under an offer to encourage employees to accept voluntary redundancy, a provision is recognised with a corresponding expense in profit or loss at the earlier of the following dates:

- When the Group cannot unilaterally withdraw the offer of termination benefits because of an employee termination plan or a curtailment proposal.
- When the Group has a formal detailed restructuring plan involving the payment of termination benefits and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

22. Employee benefits (cont'd)

(3) Termination benefits (cont'd)

If the benefits are payable more than 12 months after the end of the reporting period, they are discounted to their present value. The discount rate used is the yield on the reporting date on highly-rated corporate debentures denominated in the same currency, that have maturity dates approximating the terms of the Group's obligation.

(4) Other long-term employee benefits

The Group's net obligation for long-term employee benefits, which are not attributable to post-employment benefit plans, is for the amount of the future benefit to which employees are entitled for services that were provided during the current and prior periods.

The amount of these benefits is discounted to its present value and the fair value of the assets related to these obligations is deducted therefrom. The discount rate used is the yield on the reporting date on highly-rated corporate debentures denominated in the same currency, that have maturity dates approximating the terms of the Group's obligation.

23. Provisions

Provisions are recognized when the Group has a present obligation related to a contingency, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the settlement date, taking into account factors pertaining to a contingency such as the risks, uncertainties and time value of money. Where the effect of the time value of money is material, the amount of the provision is determined by discounting the related future cash outflows. The increase in the provision due to passage of time is recognized as interest expense.

If all or part of the provision settlements is reimbursed by third parties, when the realization of income is virtually certain, then the related asset should be recognized. However, the amount of related asset recognized should not be exceeding the respective provision amount.

At the balance sheet date, the amount of provision should be re-assessed to reflect the best estimation then.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

24. Share-based payment

Share-based payment refers to the transaction in order to aquire the service offered by the employees or other parties that grants equity instruments or liabilities on the basis of the equity instruments. Share-based payment classified into equity-settled share-based payment and cash-settled share-based payment.

Cash-settled share-based payment

The cash-settled share-based payment should be measured according to the fair value of the liabilities recognized based on the shares or other equity instrument undertaken by the Company. For cash-settled share-based payment made in return for the rendering of employee services that cannot be exercised until the services are fully provided during the vesting period or specified performance targets are met, on each balance sheet date within the vesting period, the services acquired in the current period shall, based on the best estimate of the number of exercisable instruments, be recognized in relevant expenses and the corresponding liabilities at the fair value of the liability incurred by the Company.

On each balance sheet date and the settlement date before the settlement of the relevant liabilities, the Company should re-measure the fair value of the liabilities and the changes should be included in the current period profit or loss.

25. Revenue

Revenue of the Group is mainly from sale of goods.

The Group recognises revenue when transferring goods to a customer, at the amount of the transaction price. An asset is transferred when the customer obtains control of that asset. Transaction price is the amount of consideration to which an entity expects to be entitled in exchange for transferring goods to a customer, excluding amounts collected on behalf of third parties.

Significant financing component

For a contract with a significant financing component, the Group recognise revenue at an amount that reflects the price that a customer would have paid for the goods if the customer had paid cash for those goods when they transfer to the customer. The difference between the amount of consideration and the cash selling price of the goods, is amortized in the contract period with the effective interest rate. The Group does not adjust the amount of consideration for the effects of a significant financing component if the Group expects, at contract inception, that the period between when the entity transfers a good to a customer and when the customer pays for that good will be one year or less.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

25. Revenue (cont'd)

Sale with a right of return

For sale with a right if return, the Group recognizd revenue at the amount of consideration to which the Group expects to be entitled (ie excluding the products expected to be returned). For any amounts received (or receivable) for which an entity does not expect to be entitled, the entity shall not recognise revenue when it transfers products to customers but shall recognise those amounts received (or receivable) as a refund liability. An asset recognised for the Group's right to recover products from a customer on settling a refund liability shall initially be measured by reference to the former carrying amount of the product less any expected costs to recover those products.

26. Government grants

Government grants are transfer of monetary assets and non-monetary assets from the government to the Group at no consideration, including tax returns, financial subsidies and so on. A government grant is recognized only when the Group can comply with the conditions attaching to the grant and the Group will receive the grant.

If a government grant is in the form of a transfer of a monetary asset, it is measured at the amount received or receivable. If a government grant is in the form of a non-monetary asset, it is measured at fair value. If the fair value cannot be reliably determined, it is measured at a nominal amount. A government grant measured at a nominal amount is recognized immediately in profit or loss for the period.

(1) The basis of judgment and accounting method of the government grants related to assets

Government grants obtained for acquiring long-term assets are government grants related to assets.
A government grant related to an asset is offset with the cost of the relevant asset.

(2) The basis of judgment and accounting method of the government grants related to income

For a government grant related to income, if the grant is a compensation for related expenses or losses to be incurred in subsequent periods, the grant is recognized as deferred income, and recognized in profit or loss over the periods in which the related costs are recognized. If the grant is a compensation for related expenses or losses already incurred, the grant is recognized immediately in profit or loss for the period.

Government grants related to the Group's normal course of business are offset with related costs and expenses. Government grants related that are irrelevant with the Groups's normal course of business are included in non-operating gains.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

27. Deferred tax assets/deferred tax liabilities

The income tax expenses include current income tax and deferred income tax.

(1) Current income tax

At the balance sheet date, current income tax liabilities (or assets) for the current and prior periods are measured at the amount expected to be paid (or recovered) according to the requirements of tax laws.

(2) Deferred tax assets and deferred tax liabilities

Temporary differences are differences between the carrying amounts of certain assets or liabilities and their tax base.

All taxable temporary differences are recognized as related deferred tax liabilities. Deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which the deductible losses and tax credits can be utilized.

For deductible losses and tax credits that can be carried forward, deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which the deductible losses and tax credits can be utilized. However, for deductible temporary differences associated with the initial recognition of goodwill and the initial recognition of an asset or liability arising from a transaction (not a business combination) that affects neither the accounting profit nor taxable profits (or deductible losses) at the time of transaction, no deferred tax asset or liability is recognized.

At the balance sheet date, deferred tax assets and liabilities are measured at the tax rates, according to tax laws, that are expected to apply in the period in which the asset is realized or the liability is settled.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The Group may be required to pay additional tax in case of distribution of dividends by the Group companies. This additional tax was not included in the financial statements, since the policy of the Group is not to distribute in the foreseeable future a dividend which creates a significant additional tax liability.

Except for those current income tax and deferred tax charged to comprehensive income or shareholders' equity in respect of transactions or events which have been directly recognized in other comprehensive income or shareholders' equity, and deferred tax recognized on business combinations, all other current income tax and deferred tax items are charged to profit or loss in the current period.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

27. Deferred tax assets/deferred tax liabilities (cont'd)

At the balance sheet date, the carrying amount of deferred tax assets is reviewed and reduced if it is no longer probable that sufficient taxable profits will be available in the future to allow the benefit of deferred tax assets to be utilized. Such reduction is reversed when it becomes probable that sufficient taxable profits will be available.

(3) Offset of income tax

When the Group has a legal right to settle on a net basis and intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously, current tax assets and current tax liabilities are offset and presented on a net basis.

When the Group has a legal right to settle current tax assets and liabilities on a net basis, and deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax assets and liabilities on a net basis or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax assets or liabilities are expected to be reversed, deferred tax assets and deferred tax liabilities are offset and presented on a net basis.

28. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

(1) The Group as lessee under operating leases

Operating lease payments are recognized on a straight-line basis over the term of the relevant lease, and are either included in the cost of related asset or charged to profit or loss for the period. Initial direct costs incurred are charged to profit or loss for the period.

(2) The Group as lessor under operating leases

Rental income from operating leases is recognized in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs with more than an insignificant amount are capitalized when incurred, and are recognized in profit or loss on the same basis as rental income over the lease term. Other initial direct costs with an insignificant amount are charged to profit or loss in the period in which they are incurred.

(3) The Group as lessee under finance leases

At the commencement of the lease term, the Group records the leased asset at an amount equal to the lower of the fair value of the leased asset and the present value of the minimum lease payments at the inception of the lease, and recognizes a long-term payable at an amount equal to the minimum lease payments. The difference between the recorded amounts is deferred. Besides, initial direct costs that are attributable to the leased item incurred during the process of negotiating and securing the lease agreement are also added to the amount recognized for the leased asset.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

28. Leases (cont'd)

(4) The Group as lessee under finance leases

The deferred expense are recognized as financial expenses in profit or loss using the effective interest method over the lease term. Contingent rents are credited to profit or loss in the period in which they are actually incurred. The net amount of minimum lease payments less deferred expense is separated into long-term liabilities and the portion of long-term liabilities due within one year for presentation.

29. Other significant accounting policies and accounting estimates

29.1 Hedging

The Group uses derivative financial instruments to hedge its risks related to foreign currency and inflation risks and derivatives that are not used for hedging.

Hedge accounting
On the commencement date of the accounting hedge, the Group formally documents the relationship between the hedging instrument and hedged item, including the Group's risk management objectives and strategy in executing the hedge transaction, together with the methods that will be used by the Group to assess the effectiveness of the hedging relationship.

The Group makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, whether the hedge is expected to be effective in offsetting the changes in the fair value of cash flows that can be attributed to the hedged risk during the period for which the hedge is designated.

An effective hedge exsists when all of the below conditions are met:

- There is an economic relationship between the hedged item and the hedging instrument
- the effect of credit risk does not dominate the value changes that result from that economic relationship
- the hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the entity actually hedges and the quantity of the hedging instrument that the entity actually uses to hedge that quantity of hedged item.

With respect to a cash-flow hedge, a forecasted transaction that constitutes a hedged item must be highly probable and must give rise to exposure to changes in cash flows that could ultimately affect profit or loss.

Measurement of derivative financial instruments
Derivative financial instruments are recognized initially at fair value; attributable transaction costs are recognized in profit or loss as incurred.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

29. Other significant accounting policies and accounting estimates (cont'd)

29.1 Hedging (cont'd)

Cash-flow hedges
Subsequent to the initial recognition, changes in the fair value of derivatives used to hedge cash flows are recognized through other comprehensive income directly in a hedging reserve, with respect to the part of the hedge that is effective. Regarding the portion of the hedge that is not effective, the changes in fair value are recognized in profit and loss. The amount accumulated in the hedging reserve is reclassified to profit and loss in the period in which the hedged cash flows impact profit or loss and is presented in the same line item in the statement of income as the hedged item.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, the hedge accounting is discontinued. The cumulative gain or loss previously recognized in a hedging reserve through other comprehensive income remains in the reserve until the forecasted transaction occurs or is no longer expected to occur. If the forecasted transaction is no longer expected to occur, the cumulative gain or loss in respect of the hedging instrument in the hedging reserve is reclassified to profit or loss.

Economic hedge
Hedge accounting is not applied with respect to derivative instruments used to economically hedge financial assets and liabilities denominated in foreign currency or CPI linked. Changes in the fair value of such derivatives are recognized in profit or loss as financing income or expenses.

Derivatives that are not used for hedging
Changes in the fair value of derivatives that are not used for hedging are recognized in profit or loss as financing income or expenses.

29.2. Securitization of assets

Details of the securitization of asset agreements and accounting policy are set out in Note V.5 Account receivables

29.3. Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system.

Two or more operating segments may be aggregated into a single operating segment if the segments have similar economic characteristics and are same or similar in respect of the nature of each product and service, the nature of production processes, the type or class of customers for the products and services, the methods used to distribute the products or provide the services, and the nature of the regulatory environment.

29.4. Profit distributions to shareholders

cninf 巨潮资讯 www.cninfo.com.cn

Dividends which are approved after the balance sheet date are not recognised as a liability at the balance sheet date but are disclosed in the notes separately.

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

30. Changes in significant accounting policies and accounting estimates

(1) Changes in significant accounting policies

The contents and reasons for the changes of accounting policiesh	Process for management approval
The Group began to adopt the following revised Accounting Standards for Business Enterprises ("ASBE") promulgated by Ministry of Finance from January 1, 2018: "Revised ASBE 22 - Financial Instruments Recognition and Measurement", "Revised ASBE 23 - Transfer of Financial Assets", "Revised ASBE 24 - Hedging", "Revised ASBE 37 - Presentation and Disclosures of Financial insturments" ("new financial instrument standards"), and "Revised ASBE 14 - Revenue" ("new revenue standard"), promulgated on 2017. Financial Instruments According to new financial instrument standards, financial assets are classified as one of the following three categories: financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income (FVTOCI), and financial assets measured at fair value through profit and loss (FVTPL), based on the "business model" and "contractual cash flow characteristics". The categories of loans and receivables, held-to-maturity investments and available-for-sale financial assets in the old financial instrument standards are cancelled. Equity investments are normally classified as financial assets at FVTPL, while it is permitted to irrevocably designate non-trading equity investments as financial assets at FVTOCI, and cumulative gain or loss previously recognised in other comprehensive income should not be classified to profit or loss upon derecognition. Impairment requirements in new financial instrument standards are applied to financial assets at amortised cost and FVTOCI, based on the "expected credit loss method". The new impairment model requires a three-stage model, to recognize 12-month or lifetime expected credit losses, depending on whether credit risk on a financial instrument has increased significantly since initial recognition. An entity shall always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not have a significant financing component. Revenue New revenue standards introduced the 5-step approach, and provides more guidances for special transactions and events. Refer to Note III.25 for details of the Group's revenue recognition and measurement. According to the new standards, opening balances should be adjusted for accumulated impact, with regards to retained earnings and other relevant accounts, with no adjustments for comparative information.	The change in the accounting policy was approved by the board of directors meeting in 2018.4.26.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

31. Changes in significant accounting policies and accounting estimates (cont'd)

(1) Changes in significant accounting policies (cont'd)

Note 1: Transfer from loans and receivables to fair value

According to the Standard, the classification of financial assets that constitute debt instruments is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. Trade receivables that are included in the securitization transaction for which consideration has not yet been received, are measured at fair value through profit or loss.

As a result of the implementation of the Standard, as at January 1, 2018, the balance of other receivables decreased by 8,279 thousand RMB with a corresponding decrease in retained earnings.

Note 2: Transfer from available-for-sale financial assets to other equity investments

As at January 1, 2018, available-for-sale financial assets were designated as financial assets at FVTOCI and reclassified to other equity investments. Such equity investments are not expected to be sold within the foreseeable future.

Since those equity investments are not quoted in an active market, according to old financial instrument standards, the investments were measured at cost.

Commencing January 1, 2018, such equity investments are measured at FVTOCI. Impairment loss recognised in prior periods of RMB 11,991 was reclassified from retained earnings to OCI, the investments were revaluated through OCI in the amount of RMB 71,546 and the deferred tax assets decreased by RMB 8,934. The OCI was increased by net amount of RMB 50,621.

Note 3: Expected credit loss

Commencing from January 1, 2018, the Group recognise credit loss impairment in accordance with new financial instrument standards.

The Standard includes a new model for the recognition of expected credit loss ('expected credit loss' model) for financial assets that are not measured at fair value through profit or loss. As a result of the implementation of the Standard, as of January 1, 2018, the provision for impairment of trade receivables increased by RMB 42,345, the deferred tax assets increased by RMB 12,277 with a corresponding decrease of RMB 30,068 in retained earnings.

Note 4: Significant financing component in revenue recognition

In assessing whether a contract contains a significant financing component, the Group examines, among other things, the expected length of time between the date on which the Group transfers the goods to the customer and the date on which the customer pays for the goods less than one year. In cases where the difference is one year or less, the Group applies the practical relief prescribed in the Standard and does not separate the significant financing component.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

32. Changes in significant accounting policies and accounting estimates (cont'd)

(1) Changes in significant accounting policies (cont'd)

Note 4: Significant financing component in revenue recognition (cont'd)

As a result of the implementation of the Standard, as of January 1, 2018, the balance of trade receivables increased by RMB 71,406 and deferred tax assets decreased by RMB 23,837, with a corresponding increase of RMB 47,569 in retained earnings.

Summary of impacts to assets, liabilities and owners' equity from adoption of new revenue standards and new financial instrument standards, as at January 1, 2018:

Items	December 31, 2017	Impact from adoption of new revenue standards	Impact from adoption of new financial instrument standards	January 1, 2018
Accounts receivable	5,056,850	71,406	(42,345)	5,085,911
Other receivable	1,037,836	-	(8,279)	1,029,557
Available for sale financial assets	19,544	-	(19,544)	
Other equity investments		-	91,090	91,090
Deferred tax assets	891,012	(23,837)	3,343	870,518
Total impact to assets	**39,613,922**	**47,569**	**24,265**	**39,685,756**
Other comprehensive income	(154,701)	-	50,621	(104,080)
Retained earnings	3,286,711	47,569	(26,356)	3,307,924
Total impact to shareholders' equity	**18,778,013**	**47,569**	**24,265**	**18,849,847**

(2) Changes in significant accounting estimates

There are no significant changes in accounting estimates in the reporting period.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

32. Significant accounting estimates and judgments

The preparation of the financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates as well as underlying assumptions and uncertainties involved are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Notes V.33, Note IX and Note XII contain information about the assumptions and their risk factors relating to post-employment benefits – defined benefit plans, fair value of financial instruments and share-based payments. Other key sources of estimation uncertainty are as follows:

32.1 Impairment of trade receivables

As described in Note III.11, trade receivables are reviewed at each balance sheet date to determine whether credit risk on a receivable has increased significantly since initial recognition, lifetime expected losses is accrued for impairment provision. Evidence of impairment includes observable data that comes to the attention of the Group about loss events such as a significant decline in the solvency of an individual debtor or the portfolio of debtors, and significant changes in the financial condition that have an adverse effect on the debtor. If there is objective evidence of a recovery in the value of receivables which can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed.

32.2 Provision for impairment of inventories

As described in Note III.12, the net realisable value of inventories is under management's regular review, and as a result, provision for impairment of inventories is recognised for the excess of inventories' carrying amounts over their net realisable value. When making estimates of net realisable value, the Group takes into consideration the use of inventories held on hand and other information available to form the underlying assumptions, including the inventories' market prices and the Group's historical operating costs. The actual selling price, the costs of completion and the costs necessary to make the sale and relevant taxes may vary based on the changes in market conditions and product saleability, manufacturing technology and the actual use of the inventories, resulting in the changes in provision for impairment of inventories. The net profit or loss may then be affected in the period when the impairment of inventories is adjusted.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

32. Significant accounting estimates and judgments (cont'd)

32.3 Impairment of assets other than inventories and financial assets

As described in Note III.21, assets other than inventories and financial assets are reviewed at each balance sheet date to determine whether the carrying amount exceeds the recoverable amount of the assets. If any such indication exists, an impairment loss is recognised.

The recoverable amount of an asset (or an asset group) is the greater of its fair value less costs to sell and its present value of expected future cash flows. Since a market price of the asset (or the asset group) cannot be obtained reliably, the fair value of the asset cannot be estimated reliably, the recoverable amount is calculated based on the present value of estimated future cash flows. In assessing the present value of estimated future cash flows, significant judgements are exercised over the asset's production, selling price, related operating expenses and discount rate to calculate the present value. All relevant materials which can be obtained are used for estimation of the recoverable amount, including the estimation of the production, selling price and related operating expenses based on reasonable and supportable assumptions.

32.4 Depreciation and amortisation of assets such as fixed assets and intangible assets

As described in Note III.16 and 19, assets such as fixed assets and intangible assets are depreciated and amortised over their useful lives after taking into account residual value. The estimated useful lives of the assets are regularly reviewed to determine the depreciation and amortisation costs charged in each reporting period. The useful lives of the assets are determined based on historical experience of similar assets and the estimated technical changes. If there have been significant changes in the factors used to determine the depreciation or amortisation, the rate of depreciation or amortisation is revised prospectively.

32.5 Income taxes and deferred income tax

The Company and Group companies are assessed for income tax purposes in a large number of jurisdictions and, therefore, Company management is required to use considerable judgment in determining the total provision for taxes and attribution of income.

When assessing whether there will be sufficient future taxable profits available against which the deductible temporary differences can be utilised, the Group recognises deferred tax assets to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences can be utilised, using tax rates that would apply in the period when the asset would be utilised. In determining the amount of deferred tax assets, the Group makes reasonable judgements and estimates about the timing and amount of taxable profits to be utilised in the following periods, and of the tax rates applicable in the future according to the existing tax policies and other relevant regulations. If the actual timing and amount of future taxable profits or the actual applicable tax rates differ from the estimates made by management, the differences affect the amount of tax expenses.

cninf 巨潮资讯 www.cninfo.com.cn

III SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (cont'd)

32. Significant accounting estimates and judgments (cont'd)

32.6 Contingent liabilities

When assessing the possible outcomes of legal claims filed against the Company and its investee companies, the company positions are based on the opinions of their legal advisors. These assessments by the legal advisors are based on their professional judgment, considering the stage of the proceedings and the legal experience accumulated regarding the various matters. Since the results of the claims will be determined by the courts, the outcomes could be different from the assessments.

In addition to the said claims, the Group is exposed to unasserted claims, inter alia, where there is doubt as to interpretation of the agreement and/or legal provision and/or the manner of their implementation. This exposure is brought to the Company's attention in several ways, among others, by means of contacts made to Company personnel. In assessing the risk deriving from the unasserted claims, the Company relies on internal assessments by the parties dealing with these matters and by management, who weigh assessment of the prospects of a claim being filed, and the chances of its success, if filed. The assessment is based on experience gained with respect to the filing of claims and the analysis of the details of each claim. By their nature, in view of the preliminary stage of the clarification of the legal claim, the actual outcome could be different from the assessment made before the claim was filed.

32.7 Employee benefits

The Group's liabilities for long-term post-employment and other benefits are calculated according to the estimated future amount of the benefit to which the employee will be entitled in consideration for his services during the current period and prior periods. The benefit is stated at present value net of the fair value of the plan's assets, based on actuarial assumptions. Changes in the actuarial assumptions could lead to material changes in the book value of the liabilities and in the operating results.

32.8 Derivative financial instruments

The Group enters into transactions in derivative financial instruments for the purpose of hedging risks related to foreign currency and inflationary risks. The derivatives are recorded at their fair value. The fair value of derivative financial instruments is based on quotes from financial institutions. The reasonableness of the quotes is examined by discounting the future cash flows, based on the terms and length of the period to maturity of each contract, while using market interest rates of a similar instrument as of the measurement date. Changes in the assumptions and the calculation model could lead to material changes in the fair value of the assets and liabilities and in the results.

cninf 巨潮资讯 www.cninfo.com.cn

IV TAXATION

1. Main types of taxes and corresponding tax rates:

The income tax rate in China to the Company is 25%. The subsidiaries outside of China are assessed based on the tax laws in the country of their residence.

Set forth below are the tax rates outside China relevant to the subsidiaries with significant sales to third party:

Name of subsidiary	Location	2018
ADAMA agriculture solutions Ltd.	Israel	23.0%
ADAMA Makhteshim	Israel	7.5%
ADAMA Agan	Israel	16.0%
ADAMA Brasil S/A	Brazil	34.0%
ADAMA of North America Inc.	U.S.	24.7%
ADAMA India Private Ltd	India	34.6%
ADAMA Deutschland GmbH	Germany	32.5%
Control Solutions Inc.	U.S.	24.0%
Adama Australia Pty Ltd	Australia	30.0%
ADAMA France S.A.S	France	32.2%
ADAMA Andina B.V. Sucursal Colombia	Colombia	34.0%
ADAMA Italia S.R.L.	Italy	27.9%
Alligare Inc.	U.S.	27.5%

The VAT rate of the Group's subsidiaries is in the range between 2.5% to 27%.

A. Benefits from Hi-Tech Certificate

The Company, was jointly approved as new and high-tech enterprise, by the Hubei Provincial Department of Science and Technology, Department of Finance of Hubei Province, Hubei Provincial Office of the State Administration of Taxation and Hubei Local Taxation Bureau, and the applicable income tax rate from 2017 to 2019 is 15%.

B. Benefits under the Law for the Encouragement of Capital Investments

Industrial enterprises of subsidiaries in Israel were granted “Approved Enterprise” or “Beneficiary Enterprise” status under the Israeli Law for the Encouragement of Capital Investments, 1959. Part of the income deriving from the “Approved Enterprise” or “Beneficiary Enterprise” during the benefit period is subject to tax at the rate of up to 25% (the total benefit period is seven years and in certain circumstances up to ten years, but may not exceed 14 years from the date of the Letter of Approval and 12 years from the date the “Approved Enterprise” commenced operations or not more than 12 years from the election year for a “Beneficiary Enterprise”).

Other industrial enterprises of subsidiaries in Israel are entitled to a tax exemption for periods of between two and six years and a tax rate of up to 25% for the remainder of the benefits period. Should a dividend be distributed from the tax-exempt income, the subsidiaries will be liable for tax on the income from which the dividend was distributed at a rate of 25%.

cninf 巨潮资讯 www.cninfo.com.cn

IV. Taxation (cont'd)

2. Tax preferential

The aforementioned benefits are conditional upon compliance with certain conditions specified in the Law, related Regulations and the Letters of Approval, in accordance with which the investments in the Approved Enterprises were made. Failure to meet these conditions may lead to cancellation of the benefits, in whole or in part, and to repayment of any benefits already received, together with interest. Management believes that the companies are in compliance with these conditions.

C. Amendment to the Law for the Encouragement of Capital Investments, 1959.

On December 29, 2010 the Israeli parliament approved the Economic Policy Law for 2011-2012, which includes an amendment to the Law for the Encouragement of Capital Investments – 1959 (hereinafter – "the Amendment"). The Amendment is effective from January 1, 2011 and its provisions apply to preferred income derived or accrued in 2011 and thereafter by a preferred company, per the definition of these terms in the Amendment. Companies can choose not to be included in the scope of the amendment to the Encouragement Law and to stay in the scope of the law before its amendment until the end of the benefits period of its approved/beneficiary enterprise.

As of the date of the report, all subsidiaries in Israel adopted the amendment and the deferred taxes were calculated accordingly.

he Amendment provides that only companies in Development Area A will be entitled to the grants track. Further, they will be entitled to receive benefits both under this track and under the tax benefits track at the same time. In addition, the existing tax benefit tracks were eliminated (the tax exempt track, the "Ireland" track and the "Strategic" track) and two new tax tracks were introduced in their place, a preferred enterprise and a special preferred enterprise, which mainly provide a uniform and reduced tax rate for all the company's income entitled to benefits.

On August 5, 2013 the Israeli Parliament passed the Law for Changes in National Priorities (Legislative Amendments for Achieving Budget Objectives in the Years 2013 and 2014) – 2013, which cancelled the planned tax reduction so that as from the 2014 tax year the tax rate on preferred income will be 9% for Development Area A and 16% for the rest of the country.

On December 22, 2016, the Israeli Parliament passed the Economic Efficiency Law (Legislative Amendments for Achieving Budget Objectives in the years 2017 and 2018) – 2016, by which, inter alia, preferred enterprise in Development Area A, will be subject to tax rate of 7.5% instead of 9% effective from January 1, 2017 and thereafter (the tax rate applicable to preferred enterprises located in other areas remains at 16%)

The amendment further determined that no tax shall apply to dividend distributed out of preferred income to shareholder who is Israel resident company. On dividend distributed out of preferred income to a single shareholder or a foreign resident subject to double taxation treaties, tax of 20% shall apply.

D. Benefits under the Law for the Encouragement of Industry (Taxes), 1969

Under the Israeli Law for the Encouragement of Industry (Taxes) 1969, the Company is an Industrial Holding Company and some of the subsidiaries in Israel are "Industrial Companies". The main benefit under

cninf 巨潮资讯 www.cninfo.com.cn

this law is the filing of consolidated income tax returns (the Company files a consolidated income tax return with Adama Makhteshim) and amortization of know-how over 8 years.

Party D	75,661	1	-
Party E	75,290	1	-
Total	467,581	7	5,823

(4) Derecognition of accounts receivable due to transfer of financial assets

Certain subsidiaries of the group entered into a securitization transaction with Rabobank International for sale of trade receivables (hereinafter – "the Securitization Program" and/or "the Securitization Transaction").

Pursuant to the Securitization Program, the companies will sell their trade receivables debts, in various different currencies, to a foreign company that was set up for this purpose and that is not owned by the Adama Agricultural Solutions Group (hereinafter – "the Acquiring Company"). Acquisition of the trade receivables by the Acquiring Company is financed by a U.S. company, Nieuw Amsterdam Receivables Corporation for the Rabobank International Group.

The trade receivables included as part of the Securitization Transaction are trade receivables that meet the criteria provided in the agreement.

Every year the credit facility is re approved in accordance with the Securitization Program. As at the date of the report, the Securitization Agreement was approved up to July 31, 2018. Subsequent to the report date, the Securitization Agreement was extended up to July 31, 2019.

cninf 巨潮资讯 www.cninfo.com.cn

5. Accounts Receivable (cont'd)

(4) Derecognition of accounts receivable due to transfer of financial assets (cont'd)

The maximum scope of the securitization is adjusted for the seasonal changes in the scope of the Company's activities, as follows: during the months March through June the maximum scope of the securitization is $350 million, during the months July through September the maximum scope of the securitization is $300 million and during the months October through February the maximum scope of the securitization is $250 million. The proceeds received from those customers whose debts were sold are used for acquisition of new trade receivables.

The price at which the trade receivables debts are sold is the amount of the debt sold less a discount calculated based on, among other things, the expected length of the period between the date of sale of the trade receivable and its anticipated repayment date. In the month following acquisition of the debt, the Acquiring Company pays in cash most of the debt while the remainder is recorded as a subordinated note that is paid after collection of the debt sold. If the customer does not pay its debt on the anticipated repayment date, the Company bears interest up to the earlier of the date on which the debt is actually repaid or the date on which the Acquiring Company is indemnified by the insurance company (the actual costs are not significant and are not expected to be significant).

The Acquiring Company bears 90% of the credit risk in respect of the customers whose debts were sold and will not have a right of recourse to the Company in respect of the amounts paid in cash, except regarding debts with respect to which a commercial dispute arises between the companies and their customers, that is, a dispute the source of which is a claim of non-fulfillment of an obligation of the seller in the supply agreement covering the product, such as: a failure to supply the correct product, a defect in the product, delinquency in the supply date, and the like.

The Acquiring Company appointed a policy manager who will manage for it the credit risk involved with the trade receivables sold, including an undertaking with an insurance company.

Pursuant to the Receivables Servicing Agreement, the Group companies handle collection of the trade receivables as part of the Securitization Transaction for the benefit of the Acquiring Company.

As part of the agreement, the subsidiary committed to comply with certain financial covenants, mainly the ratio of the liabilities to equity and profit ratios. As of June 30, 2018 the subsidiary was in compliance with the financial covenants.

The accounting treatment of sale of the trade receivables included as part of the Securitization Program is:

The Company is not controlling the Acquiring Company, therefore is not consolidated the Acquiring Company in its financial statements.

The Company continues to recognize the trade receivables included in the Securitization Program based on the extent of its continuing involvement therein.

In respect of the part of the trade receivables included in the securitization Program with respect to which cash proceeds were not yet received, however regarding which the Company has transferred the credit risk, a subordinated note is recorded.

The loss from sale of the trade receivables is recorded at the time of sale in the statement of income in the "financing expenses" category.

5. Accounts Receivable (cont'd)

(4) Derecognition of accounts receivable due to transfer of financial assets (cont'd)

In the fourth quarter of 2016, a subsidiary in Brazil (hereinafter - "the subsidiary") entered into a 3 years securitization transaction with Rabobank Brazil for sale of trade receivables. Under the agreement, the subsidiary will sell its trade receivables to a securitization structure (hereinafter - "the entity") that was formed for this purpose where the subsidiary has subordinate rights of 5% of the entity's capital.

The maximum securitization scope amounts to BRL 200 million (as of June 30, 2018 - 343 million RMB).

On the date of the sale of the trade receivables, the entity pays the full amount which is the debt amount sold net of discount calculated, among others, over the expected length of the period between the date of sale of the customer receivable and its anticipated repayment date.

The entity bears 90% of the credit risk in respect of the customers whose debts were sold such that the entity has the right of recourse of 10% of the unpaid amount. The subsidiary should make a pledged deposit equal to the amount the entity's right of recourse.

The subsidiary handles the collection of receivables included in the securitization for the entity.

The subsidiary does not control the entity and therefore the entity is not consolidated in the group's financial statements.

The subsidiary continues to recognize the trade receivables sold to the entity based on the extent of its continuing involvement therein (10% right of recourse) and also recognizes an associated liability in the same amount.

The loss from the sale of the trade receivables is recorded at the time of sale in the statement of income in the "financing expenses" category.

(1) The subsidiaries, wholly-controlled by the Company, signed several agreements with Aventis and Syngenta A.G and Bayer Crop Science A.G in 2001, 2002, 2017 and 2018, for the acquisition of intellectual property rights, trademarks, brand name, technological know-how, information on customers and suppliers of materials and distribution rights in the field of agrochemicals.

(2) Part of the land in Israel has not yet been registered in the name of the Group companies at the Land Registry Office, mostly due to registration procedures or technical problems.

cninf 巨潮资讯 www.cninfo.com.cn

16. Intangible Assets (cont'd)

(2) Additional information

As part of the development of its business and in order to obtain the necessary regulatory approvals to CNAC from the China National Chemical Corporation group (hereinafter- "CC") for the acquisition of Syngenta AG ("Syngenta"), the Company agreed with CC and Syngenta to sell several of its products against receiving products with similar characteristics and economic value from Syngenta, including Syngenta's bearing of all expenses and taxes the Company will be required to pay.

Accordingly, during 2017, the Company received certain products and rights from Syngenta in the United States, against the sale of a number of the Company's products to Amvac Chemical Corporation for the purpose of obtaining approval from the US Authority (FTC). The proceeds received for the sold products and the cost of the acquired properties in the US are not material.

On March 16, 2018, the transaction for the sale of the Company's registrations assets in certain European countries to Nufarm Limited was completed, while the Company retained its right to continue to sell these products in other countries outside and sometimes also within Europe, in addition to signing supply and formulation agreements for a period of two years. The consideration received from Nufarm for the sale of the assets and for the supply and formulation agreements amounted to 2,511 million RMB (including deferred income of 93 million RMB). The capital gain generated from the sale amounted to 1,998 million RMB. The tax expenses in respect of the capital gain amounted to approximately 442 million RMB.

Concurrent with the sale of said assets in Europe, the transaction for the acquisition of certain registration and marketing rights in Europe from Syngenta by the Company was completed. The cost of purchased intangible assets amounted to 2,072 million RMB.

As a result of these transactions, the addition to intangible assets amounted to 2,137 million RMB that was recorded under intangible assets.

Approximately 2,025 million RMB in respect of acquisition of registration assets and marketing rights are recorded as assets in the purchase of products and is amortized over the economic life of the assets, ranging from 1 to 14 years (mainly between 7 and 11 years).

An amount of approximately 112 million RMB was recorded as non-competitive and is amortized over the non-competition period which is five years or over the economic life of the related assets if it is less than 5 years.

The valuation model used to allocate the consideration to the acquired assets is Discounted Cash Flow (DCF).

cninf 巨潮资讯 www.cninfo.com.cn

17. Goodwill

The Group identified two cash generating units ("CGU"), Crop Protection (Agro) and Other (Non Agro) units. Operations are allocated into either one of the two cash generating units according to their business.
At the end of the year, or more frequently whether indicators for impairment exists, the Group estimates the recoverable amount of Agro and Non Agro units, which are the cash generating units of the Group that contain goodwill.
As at the reporting period, there were no indicators for impairment. The fair value of the cash generating units to which the goodwill relates exceeds its carrying amount.

(6) Unrecognised deferred tax liabilities

When calculating the deferred taxes, taxes that would have applied in the event of realizing investments in subsidiaries were not taken into account since it is the Company's intention to hold these investments and not realize them.

Deferred tax assets in respect of losses carried forward for tax purposes as of January 1, 2018 are mainly in respect of subsidiaries in Israel. Deferred tax assets were recognized because future taxable income was expected against which the unutilized tax losses could be utilized, mainly due to capital gain from the closing of the transaction for selling certain products in Europe during the first quarter of 2018, as described in Note 16 Intangible Assets, or up to the balance of deferred tax liability.

19. Other Non-Current Assets

	June 30 2018	January 1 2018
Assets related to securitization transactions	62,123	88,832
Judicial deposits	49,823	50,150
Call option in respect of business combination	12,876	13,545
Advances in respect of non current assets	13,463	11,196

33. Long-Term Employee Benefits Payable (cont'd)

Post-employment benefit plans – defined benefit plan and early retirement

(2) Actuarial assumptions and sensitivity analysis

The principal actuarial assumptions at the reporting date for defined benefit plan

	June 30 2018	January 1 2018
Discount rate (%)*	**1.1-4.5%**	**1.1%-4.5%**

*According to the demographic and the benefit components

The assumptions regarding the future mortality rate are based on published statistical data and acceptable mortality rates.

Possible reasonable changes as of the date of the report in the discount rate, assuming the other assumptions remain unchanged, would have affected the defined benefit obligation as follows:

	As of June 30, 2018	
	Increase of 1%	Decrease of 1%
Discount rate	(41,123)	50,404

34. Provisions

	June 30 2018	January 1 2018	Reasons
Liabilities in respect of contingencies	74,814	124,882	Obligations of pending litigations, where an outflow of resources had been reliably estimated
Other	38,227	39,031	
	113,041	163,913	

35. Deferred income

	Balance at January 1, 2018	Additions	Decrease	Current maturities	Balance at June 30, 2018
Long term deferred income	-	93,153	(1,692)	(47,249)	44,212
	-	93,153	(1,692)	(47,249)	44,212

*See Note V. 16(2).

VIII. Risk Related to Financial Instruments

A. General

The Group has extensive international operations, and, therefore, it is exposed to credit risks, liquidity risks and market risks (including currency risk, interest risk and other price risk). In order to reduce the exposure to these risks, the Group uses financial derivatives instruments, including forward transactions, swaps and options (hereinafter – "derivatives").
Transactions in derivatives are undertaken with major financial and, therefore, in the opinion of Group Management the credit risk in respect thereof is low.

This note provides information on the Group's exposure to each of the above risks, the Group's objectives, policies and processes regarding the measurement and management of the risk. Additional quantitative disclosure is included throughout the consolidated financial statements.

The Board of Directors has overall responsibility for establishing and monitoring the framework of the Group's risk management policy. The Finance Committee is responsible for establishing and monitoring the Group's actual risk management policy. The Chief Financial Officer reports to the Finance Committee on a regular basis regarding these risks.

cninf 巨潮资讯 www.cninfo.com.cn

VIII. Risk Related to Financial Instruments (Cont'd)

A. General (Cont'd)

The Group's risk management policy are established to identify and analyze the risks facing the Group, to set appropriate risk limits and controls and monitoring the risks and adherence to limits. The policy and methods for managing the risks are reviewed regularly, in order to reflect changes in market conditions and the Group's activities. The Group, through training, and management standards and procedures, aims to develop a disciplined and constructive control environment in which all the employees understand their roles and obligations.

B. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and derives mainly from account receivables and other receivables as well as from cash and deposits in financial institutions.

Accounts and other receivables

The Group's revenues are derived from a large number of widely dispersed customers in many countries. Customers include multi-national companies and manufacturing companies, as well as distributors, agriculturists, agents and agrochemical manufacturers who purchase the products either as finished goods or as intermediate products for their own requirements.
The Company entered into an agreement for the sale of trade receivables in a securitization transaction, for details see note V.5 (4).

In April 2018, a two-year agreement with an international insurance company was renewed. The amount of the insurance coverage was fixed at $150 million cumulative per year. The indemnification is limited to about 90% of the debt.

The Group's exposure to credit risk is influenced mainly by the personal characterization of each customer, and by the demographic characterization of the customer's base, including the risk of insolvency of the industry and geographic region in which the customer operates. No single customer accounted for greater than 5% of total accounts receivable.

Company management has prescribed a credit policy, whereby the Company performs current ongoing credit evaluations of existing and new customers, and every new customer is examined thoroughly regarding the quality of his credit, before offering him the Group's customary shipping and payment terms. The examination made by the Group includes an outside credit rating, if any, and in many cases, receipt of documents from an insurance company. A credit limit is prescribed for each customer, setting the maximum outstanding amount of the accounts receivable balance. These limits are examined annually.
Customers that do not meet the Group's criteria for credit quality may do business with the Group on the basis of a prepayment or against furnishing of appropriate collateral.

Most of the Group's customers have been doing business with it for many years. In monitoring customer credit risk, the customers were grouped according to a characterization of their credit, based on geographical location, industry, aging of receivables, maturity, and existence of past financial difficulties. Customers defined as "high risk" are classified to the restricted customer list and are supervised by management. In certain countries, mainly, Brazil, customers are required to provide property collaterals (such as agricultural lands and equipment) against execution of the sales, the value of which is examined on a current ongoing basis by the Company. In these countries, in a case of a

cninf 巨潮资讯 www.cninfo.com.cn

doubtful debt, the Company records a provision for the amount of the debt less the value of the collaterals provided and acts to realize the collaterals.

cninf 巨潮资讯 www.cninfo.com.cn

VIII . Risk Related to Financial Instruments (cont'd)

B. Credit risk (cont'd)

The Group closely monitors the economic situation in Eastern Europe and South America where necessary it operates to limit its exposure to customers in countries having significantly unstable economies.

The Group recognizes an impairment provision, which reflects its assessment regarding the credit risk of account receivables, other receivables and investments on a lifetime expected credit loss basis. See also notes III.10 and III.11.

Cash and deposits in banks

The Company holds cash and deposits in banks with a high credit rating. These banks are also required to comply with capital adequacy or maintain a level of security based on different situations.

Guarantees

The Company's policy is to provide financial guarantees only to investee companies.

Aging of receivables and allowance for doubtful accounts
Presented below is the aging of the past due trade receivables:

	June 30 2018
Past due by less than 90 days	466,592
Past due by more than 90 days	544,385
	1,010,977

C. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting its financial obligation when they come due. The Group's approach to managing its liquidity risk is to assure, to the extent possible, an adequate degree of liquidity for meeting its obligations timely, under ordinary conditions and under pressure conditions, without sustaining unwanted losses or hurting its reputation.

The cash-flow forecast is determined both at the level of the various entities as well as of the consolidated level. The Company examines the current forecasts of its liquidity requirements in order to ascertain that there is sufficient cash for the operating needs, including the amounts required in order to comply with the financial liabilities, while taking strict care that at all times there will be unused credit frameworks so that the Company will not exceed the credit frameworks granted to it and the financial covenants with which it is required to comply with. These forecasts take into consideration matters such as the Company's plans to use debt for financing its activities, compliance with required financial covenants, compliance with certain liquidity ratios and compliance with external requirements such as laws or regulation.

The surplus cash held by the Group companies, which is not required for financing the current ongoing operations, is invested in short-term interest-bearing investment channels.

cninf 巨潮资讯 www.cninfo.com.cn

VIII. Risk Related to Financial Instruments (cont'd)

(1) Presented below are the contractual maturities of the financial liabilities at undiscounted amounts, including estimated interest payments:

	As at June 30, 2018

	9,346,477	613,761	1,812,876	9,486,668	21,259,782	16,971,937

(a) Including related Non current liabilities due within one year and interest payables.

cninf 巨潮资讯 www.cninfo.com.cn

VIII . Risk Related to Financial Instruments (cont'd)

(2) Interest rate risks

The Group has exposure to changes in the variable interest rate. The Group has different assets and liabilities in different countries which bear interest according to the economic environment in each country. Most of the loans, other than the debentures, bear Dollar Libor interest. As a result, most of the variable interest exposure of those loans is to the Libor interest. Due to market conditions, the variable interest rates on cash are relatively low.
The Company prepares a quarterly summary of exposure to a change in the Libor interest rate. As at the approval date of the financial statements, the Company had not hedged this exposure.

(A) Type of interest

The interest rate profile of the Group's interest-bearing financial instruments was as follows:

	June 30 2018
Fixed-rate instruments – unlinked to the CPI	
Financial assets	
Cash at banks	421,735
Other non-current assets	8,357
Financial liabilities	
Short-term loans	341,348
Long-term loans	152,913
Long-term payables	17,832
Other non-current liabilities	171,770
	(253,771)
Fixed-rate instruments – linked to the CPI	
Financial liabilities	
Debentures payable	7,584,581
	7,584,581

cninf 巨潮资讯 www.cninfo.com.cn

VIII . Risk Related to Financial Instruments (cont'd)

(A) Type of interest (Cont'd)

	June 30 2018
Variable-rate instruments	
Financial assets	
Cash at banks	536,296
Financial assets at fair value through profit or loss	32,693
Other non-current assets	48,857
Financial liabilities	
Short-term loans	43,134
Long-term loans	607,629
	(32,917)

(B) Sensitivity analysis regarding variable-interest instruments

A change of 5% in the interest rates on the reporting date would increase or reduce equity and profit or loss by the amounts presented below. This analysis assumes that all the remaining variables, among others exchange rates, remained fixed.

	Profit or loss		Equity	
	Increase in interest	Decrease in interest	Increase in interest	Decrease in interest
As at June 30, 2018	1,262	(1,278)	1,262	(1,278)

D. Market risks

Market risk is the risk that changes in market prices, such as foreign exchange rates, CPI, interest rates and prices of capital instruments, will affect the Group's revenues or the value of its holdings in its financial instruments. The objective of market risk management is to manage and monitor the exposure to market risks within acceptable parameters, while optimizing the return.

During the ordinary course of business, the Group purchases and sells derivatives and assumes financial liabilities for the purpose of managing market risks.

cninf 巨潮资讯 www.cninfo.com.cn

VIII. Risk Related to Financial Instruments (cont'd)

(1) CPI and foreign currency risks

Currency risk

The Group is exposed to currency risk from its sales, purchases, expenses and loans denominated in currencies that differ from the Group's functional currency. The main exposure is in Euro, Brazilian real, USD and in NIS. In addition, there are smaller exposures to various currencies such as the British pound, Polish zloty, Australian dollar, Indian rupee, Argentine peso, Canadian dollar, South African Rand, Ukraine Hryunia, Turkish lira and Chinese Renminbi.

The Group uses foreign currency derivatives – forward transactions and currency options – in order to hedge the cash flows risk, which derive from existing monetary assets and liabilities and anticipated sales and purchases, which may be affected by exchange rate fluctuations.

The Group hedged a part of the estimated currency exposure to anticipate sales and purchases for the subsequent year. Likewise, the Group hedges most of its monetary assets and liabilities denominated in a non-USD currency. The Group uses foreign currency derivatives to hedge its currency risk, mostly with maturity dates of less than one year from the reporting date.

The wholly-owened subsidiary debentures are linked to the NIS-CPI and, therefore, an increase in the NIS-CPI, as well as changes in the NIS exchange rate, could cause significant exposure with respect to the subsidiary functional currency – the U.S. dollar. As of the approval date of the financial statements, the subsidiary had hedged most of its exposure deriving from issuance of the debentures, in options and forward contracts.

(A) The Group's exposure to NIS-CPI and foreign currency risk, except in respect of derivative financial instruments is as follows:

	June 30, 2018	
	Total Assets	**Total liabilities**
Denominated in or linked to the Dollar	1,111,720	1,120,955
In Euro	1,903,875	913,713
In Brazilian real	1,507,931	287,960
CPI-linked NIS	-	7,580,771
In New Israeli Shekel	445,872	437,040
Denominated in or linked to other foreign currency	3,185,293	480,000
Total	8,154,691	10,820,439

cninf 巨潮资讯 www.cninfo.com.cn

VIII. Risk Related to Financial Instruments (cont'd)

(B) The exposure to CPI and foreign currency risk in respect of derivatives is as follows:

	June 30, 2018					
	Currency/ linkage receivable	Currency/ linkage payable	Average expiration date	USD thousands Par value	RMB thousands Par value	Fair value
Forward foreign currency contracts and call options	USD	EUR	2019/02/15	610,531	4,039,642	(164,455)
	USD	PLN	2018/10/10	54,182	358,504	39,154
	USD	BRL	2018/08/22	220,471	1,455,963	77,290

(C) Sensitivity analysis

The appreciation or depreciation of the Dollar against the following currencies as of June 30, 2018 and the increase or decrease in the CPI would increase or decrease the equity and profit or loss by the amounts presented below. This analysis assumes that all the remaining variables, among others interest rates, remains constant.

	June 30, 2018			
	Decrease of 5%		Increase of 5%	
	Equity	Profit (loss)	Equity	Profit (loss)
New Israeli shekel	6,021	(1,346)	657	8,024
British pound	(354)	1,230	354	(1,230)
Euro	(106,949)	6,833	127,970	(4,105)
Brazilian real	(3,859)	14,222	3,859	(14,222)
Polish zloty	(2,403)	658	2,403	(658)
South African Rand	269	269	(269)	(269)
Chinese Yuan Renminbi	2,473	2,473	(2,473)	(2,473)
CPI-linked NIS	167,939	167,939	(167,939)	(167,939)

E. Cash flow hedge accounting

The table below presents the periods in which the cash flows associated with derivatives that are cash flow hedges are expected to occur and impact the P&L:

	June 30, 2 0 1 8				
	Carrying amount	Expected cash flows	6 months or less	6-12 months	Second year
Forward contracts and options on exchange rates:	**40,752**	**40,752**	**(29,318)**	**63,210**	**6,861**

cninf 巨潮资讯 www.cninfo.com.cn

IX. Fair Value

The fair value of forward contracts on foreign currency is based on their listed market price, if available. In the absence of market prices, the fair value is estimated based on the discounted difference between the stated forward price in the contract and the current forward price for the residual period until redemption, using an appropriate interest rate.

The fair value of foreign currency options is based on bank quotes. The reasonableness of the quotes is evaluated through discounting future cash flow estimates, based on the conditions and duration to maturity of each contract, using the market interest rates of a similar instrument at the measurement date and in accordance with the Black & Scholes model.

(1) Financial instruments measured at fair value for disclosure purposes only

The carrying amount of certain financial assets and liabilities, including cash at bank and on hand, bills and accounts receivable, other receivables, derivatives financial assets, short-term loans, bills accounts payable and other payables, are the same or proximate to their fair value.
The following table details the carrying amount in the books and the fair value of groups of non-current financial instruments presented in the financial statements not in accordance with their fair values:

	June 30, 2018	
	Carrying amount	**Fair value**
Financial assets		
Other non-current assets (a – Level 2)	56,135	59,103
Financial liabilities		
Long-term loans and others (b – Level 2)	957,528	992,306
Debentures (c – Level 1)	7,584,581	9,426,908

(a) The fair value of the other non-current assets is based on a discounted future cash flows, using the acceptable interest rate for similar investment having similar characteristics (Level 2).
(b) The fair value of the long-term loans and others is based on a discounted future cash flows, using the acceptable interest rate for similar loans having similar characteristics (Level 2).
(c) The fair value of the debentures is based on stock exchange quotes (Level 1).

(2) The interest rates used determining fair value

The interest rates used to discount the estimate of anticipated cash flows are:

	June 30, 2018
	%
Brazilian real interest	8.46 - 11.39
U.S. dollar interest	2.66 - 4.00
Indian Rupee	6.69 - 8.22

cninf 巨潮资讯 www.cninfo.com.cn

IX. Fair Value (cont'd)

(3) Fair value hierarchy of financial instruments measured at fair value

The table below presents an analysis of financial instruments measured at fair value. The various levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active market for identical instrument.
- Level 2: inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The Company's forward contracts and options are carried at fair value and are evaluated by observable inputs and therefore are concurrent with the definition of level 2.

	June 30 2018
Forward contracts and options used for hedging the cash flow (Level 2)	40,752
Forward contracts and options used for economic hedging (Level 2)	(298,739)
Debt instruments (Level 1)	13,610
Other equity investments (Level 2)	91,154
Other (Level 2)	19,083
	(134,140)

Financial Instrument	Fair value
Forward contracts	Fair value measured on the basis of discounting the difference between the stated forward price in the contract and the current forward price for the residual period until redemption using an appropriate interest rates.
Foreign currency options	The fair value is measured based on the Black&Scholes model.

(4) No transfer between any levels of the fair value fierarchy in the reporting period.

(5) No change in the valuation techniques in the reporting period.

XI. Commitments and contingencies (cont'd)

Commitments and Contingent Liabilities

On October 30, 2017, the 22nd meeting of the 7th session of Board of Directors of Hubei Sanonda Co., Ltd. (hereinafter referred to as the "Company") resolved to approve as a frame work decision, the Company's engagement in annual liability insurance policies for directors, supervisors and senior officers of the Company. On November 15, 2017 the 4th interim Shareholders Meeting approved the above resolution.

According to the Policy between the Company and Ping An Property & Casualty Insurance Company of China, Ltd., for one year insurance (from October 1st, 2017 to September 30, 2018), the liability limit is $50 million for any one Claim and in the annual aggregate and the actual premium is negligible.

Environmental protection

The manufacturing processes of the Company, and the products it produces and markets, entail environmental risks that impact the environment. The Company invests substantial resources in order to comply with the applicable environmental laws and attempts to prevent or minimize the environmental risks that could occur as a result of its activities. To the best of the Company's knowledge, at the balance sheet date, none of its applicable permits and licenses with respect to environmental issues have been revoked. The Company has insurance coverage for sudden, unexpected environmental contamination.

Claims against subsidiaries

In the ordinary course of business, legal claims were filed against subsidiaries, including lawsuits regarding claims for patent infringement. Inter alia, from time to time, the Company, similar to other companies operating in the plant protection industry, is exposed to class actions for large amounts, which it must defend against while incurring considerable costs, even if these claims, from the start, have no basis. In the estimation of the Company's management, based, inter alia, on opinions of its legal counsel regarding the prospects of the proceedings, the financial statements include appropriate provisions where necessary to cover the exposure resulting from the claims.

Various immaterial claims have been filed against Group companies in courts throughout the world, in immaterial amounts, for causes of action involving mainly employee-employer relations and various civil claims, for which the Company did not record a provision in the financial statements. Furthermore, claims were filed for product liability damages, for which Solutions has appropriate insurance coverage, such that the Company's exposure in respect thereof is limited to the amount its deductible requirement or the amount thereof does not exceed the deductible amount.

cninf 巨潮资讯 www.cninfo.com.cn

XII. Share-based Payments

(1) In December 2017, the remuneration committee and the Board of Directors (and the General Meeting with respect to the CEO) of Adama solutions, a wholly-owned subsidiary, approved the allocation of 49,042,146 phantom warrants to officers and employees in accordance with the long-term phantom compensation plan ("the Plan"). The allocation date is December 28, 2017.

The warrants will vest in four equal portions, where the first and second quarters are exercisable after one year, the third quarter after two years and the fourth quarter after three years from January 1, 2018. The warrants will be exercisable, in whole or in part, in accordance with the terms of the plan, and subject to achieving financial targets as determined in the plan. The warrants may be exercised until the end of 2023.

Upon exercise of each warrant, the offeree will be entitled to receive cash payment equal to the difference between the base price as determined at the time of the grant and the closing price of one share of the company on the Shenzhen Stock Exchange, as it will be on the exercise date up to the ceiling that was determined under the plan.

The fair value of the granted warrants as aforesaid was estimated using the binomial pricing model.

The cost of the benefit embodied in the warrants that were allocated as aforesaid, based on the fair value at the end of the reporting period, amounted to a total of 206 million RMB. The liability at the end of the reporting period was recorded according to the vesting period as determined in the plan, taking into account the extent of the service that the employees provided until that date.

Statement of share based payments in the year	**Phantom warrants**
Total number of Phantom warrants granted in current period	198,417
Total number of Phantom warrants exercised in current period	-
Total number of Phantom warrants forfeited in current period	679,585
Total number of Phanom warrents at the end of the period	48,560,977
The range of the exercise prices and the remainder of the contractual period for Phantom warrants outstanding at the end of period	15.13 RMB 5.5 years

The parameters used in implementing the model are as follows:	
Stock price (RMB)	15.81
Original exercise increment (RMB)	15.13
Expected volatility	46.73%
Risk-free interest rate	3.45%
Economic value as of June 30, 2018 (in thousands RMB)	206,041

The methods for the determination of the fair value of liabilities arising from cash-settled share-based payments	The binomial pricing model
Accumulated amount of liabilities arising from cash-settled share-based payments (in thousands RMB)	102,332
Expenses arising from cash-settled share-based payments in current period (in thousands RMB)	44,648

XIII. Other significant items

(1) Segment Reporting

The Company presents its segment reporting based on a format that is based on a breakdown by business segments:

- Crop Protection (Agro)
  This is the main area of the Company's operations and includes the manufacture and marketing of conventional agrochemical products and operations in the seeds sector.
- Other (Non Agro)
  This field of activity includes a large number of sub-fields, including: Lycopan (an oxidization retardant), aromatic products, and other chemicals. It combines all the Company's activities not included in the agro-products segment.

  Segment results reported to the chief operating decision maker include items directly attributable to a segment as well as items that can be allocated on a reasonable basis. Unallocated items comprise mainly financing expenses, net, gains from changes in fair value, investment income and tax expenses.

  All assets and liabilities that can be attributed to a specific segment were allocated accordingly. Attributed assets include: accounts receivables, bills receivables, inventory, assets held for sale, fixed assets, construction in progress, intangible assets, goodwill, non-current trade receivables and long term equity investments. Attributed liabilities include account payables, bill payables, liability in respect of long-term equity investee and deferred income. All other assets and liabilities which are not attributable to a specific segment are presented as unallocated assets and liabilities.
