Franklin Resources, Inc.

Credit Suisse Financial Services Forum, February 10, 2010

Forward-Looking Statements

The financial results in this presentation are preliminary. Statements in this presentation regarding Franklin Resources, Inc. (“Franklin”) and its subsidiaries, which are not historical facts, are "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. When used in this presentation, words or phrases generally written in the future tense and/or preceded by words such as “will”, “may”, “could”, “expect”, “believe”, “anticipate”, “intend”, “plan”, “seek”, “estimate” or other similar words are forward-looking statements. Forward-looking statements involve a number of known and unknown risks, uncertainties and other important factors, some of which are listed below, that could cause actual results and outcomes to differ materially from any future results or outcomes expressed or implied by such forward-looking statements. Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. We caution you therefore against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance.

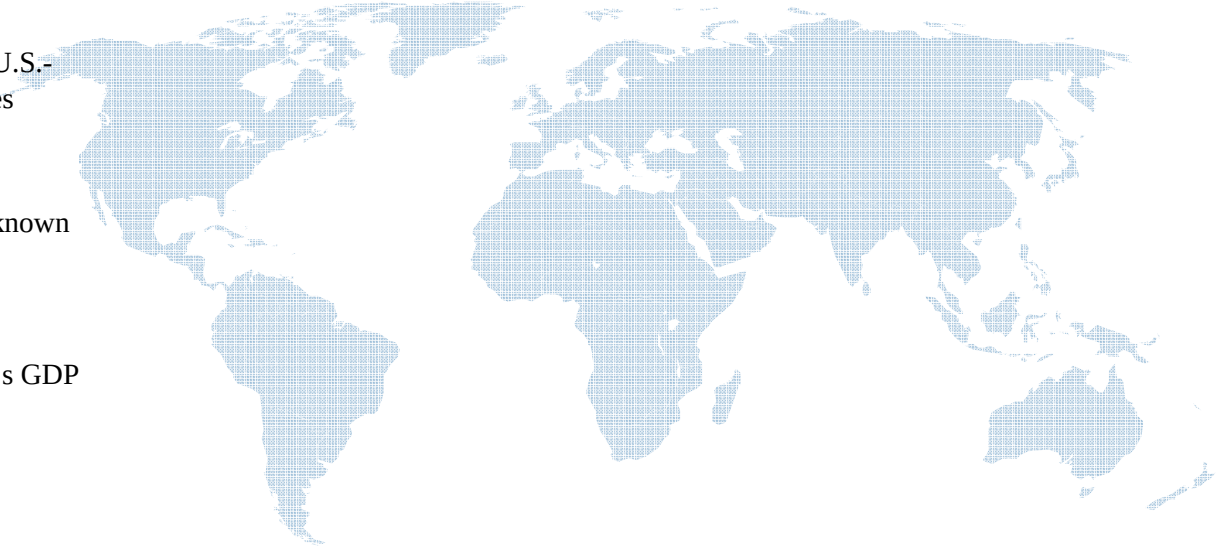

These and other risks, uncertainties and other important factors are described in more detail in Franklin’s recent filings with the U.S. Securities and Exchange Commission, including, without limitation, in Risk Factors and Management’s Discussion and Analysis of Financial Condition and Results of Operations in Franklin’s Annual Report on Form 10-K for the fiscal year ended September 30, 2009: (1) volatility and disruption of the capital and credit markets, and adverse changes in the global economy, may significantly affect our results of operations and may put pressure on our financial results; (2) the amount and mix of our assets under management are subject to significant fluctuations; (3) we are subject to extensive and complex, overlapping and frequently changing rules, regulations and legal interpretations; (4) regulatory and legislative actions and reforms have made the regulatory environment in which we operate more costly and future actions and reforms could adversely impact our assets under management, increase costs and negatively impact our profitability and future financial results; (5) changes in tax laws or exposure to additional income tax liabilities could have a material impact on our financial condition, results of operations and liquidity; (6) our ability to maintain the beneficial tax treatment we anticipate with respect to non-U.S. earnings we have repatriated is based on current interpretations of the American Jobs Creation Act of 2004 (the “Jobs Act”) and permitted use of such amounts in accordance with our domestic reinvestment plan and the Jobs Act; (7) any significant limitation or failure of our software applications, technology or other systems that are critical to our operations could constrain our operations; (8) our investment management business operations are complex and a failure to properly perform operational tasks or the misrepresentation of our products and services could have an adverse effect on our revenues and income; (9) we face risks, and corresponding potential costs and expenses, associated with conducting operations and growing our business in numerous countries; (10) we depend on key personnel and our financial performance could be negatively affected by the loss of their services; (11) strong competition from numerous and sometimes larger companies with competing offerings and products could limit or reduce sales of our products, potentially resulting in a decline in our market share, revenues and net income; (12) changes in the third-party distribution and sales channels on which we depend could reduce our revenues and hinder our growth; (13) our increasing focus on international markets as a source of investments and sales of investment products subjects us to increased exchange rate and other risks in connection with earnings and income generated overseas; (14) poor investment performance of our products could affect our sales or reduce the level of assets under management, potentially negatively impacting our revenues and income; (15) we could suffer losses in earnings or revenue if our reputation is harmed; (16) our future results are dependent upon maintaining an appropriate level of expenses, which is subject to fluctuation; (17) our ability to successfully integrate widely varied business lines can be impeded by systems and other technological limitations; (18) our inability to successfully recover should we experience a disaster or other business continuity problem could cause material financial loss, loss of human capital, regulatory actions, reputational harm or legal liability; (19) certain of the portfolios we manage, including our emerging market portfolios, are vulnerable to significant market-specific political, economic or other risks, any of which may negatively impact our revenues and income; (20) our revenues, earnings and income could be adversely affected if the terms of our management agreements are significantly altered or these agreements are terminated by the funds and other sponsored investment products we advise; (21) regulatory and governmental examinations and/or investigations, civil litigation relating to previously-settled regulatory and governmental investigations, and the legal risks associated with our business, could adversely impact our assets under management, increase costs and negatively impact our profitability and/or our future financial results; (22) our ability to meet cash needs depends upon certain factors, including the market value of our assets, operating cash flows and our perceived credit worthiness; (23) diverse and strong competition limits the interest rates that we can charge on consumer loans; (24) our business could be negatively affected if we or our banking subsidiaries fail to remain well capitalized, and liquidity needs could affect our banking business; and (25) we are dependent on the earnings of our subsidiaries.

Any forward-looking statement made by us in this presentation speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Franklin Templeton Investments: A Premier Global Investment Management Organization

World-Class Investment Management

- $553.5 billion in assets under management[1] with over 350 investment solutions worldwide[2]

The Franklin Templeton Values

Put Clients First

- We strive to know and meet our clients' needs, and we fully accept our fiduciary responsibility to protect shareholders' interests.

Build Relationships

- We work to establish enduring relationships with our clients and business partners. We value collaboration and cooperation in our workplaces.

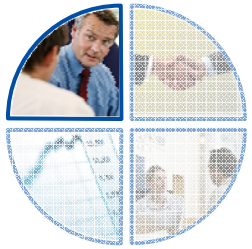

Seek to Achieve Quality Results

- We value professional excellence and expertise, and we strive to produce consistent, competitive results for our clients.

Work with Integrity

- We speak and act in an honest manner. We believe in being accountable for the impact we have on others.

Put Clients First: Responding to Evolving Customer Needs

	Key Points	Franklin Templeton Capabilities
Move To Open Architecture	• Overseas banks realized the value of offering third party funds as a way to diversify offerings and bring in customers • Momentum behind open architecture continues	• Capitalized on move to open architecture (Germany, Switzerland, Italy, Spain and Korea) • Well-positioned in France, the Netherlands, Mexico and Brazil when they make the transition to open architecture
Aging Populations	• By 2050, 16% of the world's population will be in retirement vs. 8% in 2010[1] • This segment typically has different needs as they shift from accumulation to distribution	• Have broad suite of solutions and strategies designed to support retirees' evolving needs • Well-positioned in Defined Contribution Investment Only (DCIO), institutional and retail channels to serve Defined Benefit & Defined Contribution programs
Growing Middle Class	• With economic growth accelerating and population growth decelerating, per capita income in emerging markets is likely to rise • The global middle class is expected to grow from 430 million in 2000 to 1.1 billion in 2030[2]	• Built Local Asset Management expertise and track records in high potential countries • Launched the Franklin Templeton Academy to educate financial advisors in new markets
Increasing Sophistication of Investors	• Investors are demanding more detailed information—quickly and customizable • Investment selection often involves third/related parties	• Offer a variety of investment vehicles to help meet needs • Built a robust, scalable institutional platform supporting global consultants and gatekeepers

Build Relationships: Working in Partnership

Enduring Relationships with Advisors and Institutions

- Relationships with the largest U.S. retail firms average 26 years
- Longest institutional separate account relationship dates back to 1948
- 43% of global institutional relationships are 10+ years long

The Trust of Our Business Partners and Clients

- More than 130,000 active U.S. financial advisor relationships
- Over 70,000 active global ex-U.S. financial representative relationships[1]
- Nearly 700 institutional client relationships
- More than 100 relationships established with consulting firms worldwide

Seasoned Sales and Management Professionals

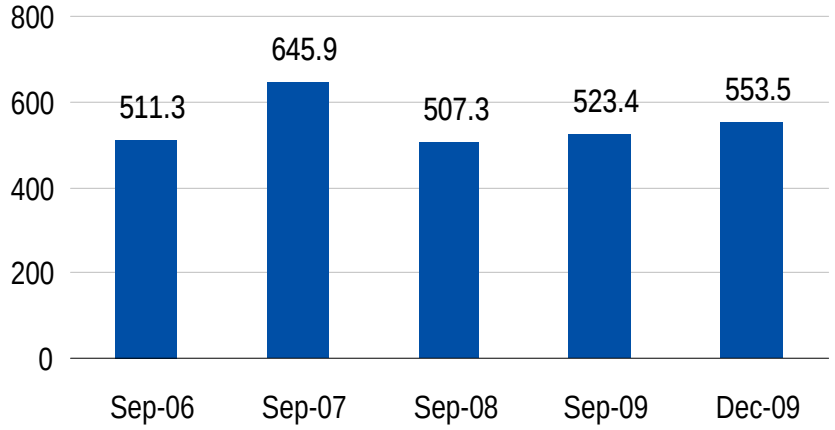

- Average U.S. Wholesaler tenure: 8 years
- Average U.S. Relationship Manager tenure: 13 years

1. Based on data collected from Canada, India, Japan and sales of cross-border funds worldwide.
