Cautions concerning forward-looking statements

This presentation contains forward-looking statements addressing expectations, prospects, estimates and other matters that are dependent upon future events or developments. These statements may be identified by words such as "expect," "anticipate," "intend," "plan," "believe," "will," "should," "could," "would," "project," "continue," "likely," and similar expressions, and include statements reflecting future results or guidance, statements of outlook and expense accruals. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied. These risks and uncertainties include competitive pressures in Cardinal Health's various lines of business; the ability to achieve the expected benefits from the generic sourcing joint venture with CVS Health; the frequency or rate of pharmaceutical price appreciation or deflation and the timing of generic and branded pharmaceutical introductions; the non-renewal or a default under one or more key customer or supplier arrangements or changes to the terms of or level of purchases under those arrangements; the ability to achieve the expected benefits from the AccessClosure and Sonexus Health acquisitions; uncertainties due to government health care reform including federal health care reform legislation; changes in the distribution patterns or reimbursement rates for health care products and services; the effects of any investigation or action by any regulatory authority; and changes in the cost of commodities such as oil-based resins, cotton, latex and diesel fuel. Cardinal Health is subject to additional risks and uncertainties described in Cardinal Health's Form 10-K, Form 10-Q and Form 8-K reports and exhibits to those reports. This presentation reflects management's views as of January 13, 2015. Except to the extent required by applicable law, Cardinal Health undertakes no obligation to update or revise any forward-looking statement. In addition, these presentations contain Non-GAAP financial measures. Cardinal Health provides GAAP numbers, definitions and reconciling information in the Financial Appendix at the end of these presentations and on its Investors page at ir.cardinalhealth.com. An audio replay of the conference call will be available on the Investors page at ir.cardinalhealth.com.

CardinalHealth
Essential to care™

FY15 strategic priorities

Generics

- Use scale and know how to deliver value via **Red Oak**
- Tailored programs to a segmented customer base

Specialty and biopharma

- Continue to increase scale
- Increase therapeutic range
- Enhance programs for biopharma

International

- Expand footprint in China
- Reposition Canada for growth
- Grow medical product scale through international markets

Health system and hospital solutions

- Integrated strategic account solutions
- Physician preference products
- Medical consumables
- Performance management tools and services

Alternate sites of care

- Accelerate growth in home
- Post-acute and ambulatory settings, leveraging IDN experience and HENRY SCHEIN® partnership
- Expand product lines, services, capabilities and touch points

Forward-Looking Non-GAAP Financial Measures

We present non-GAAP earnings from continuing operations (and presentations derived from these financial measures, including per share calculations) on a forward-looking basis. The most directly comparable forward-looking GAAP measures are earnings from continuing operations. We are unable to provide a quantitative reconciliation of these forward-looking non-GAAP measures to the most directly comparable forward-looking GAAP measures because we cannot reliably forecast restructuring and employee severance, amortization and other acquisition-related costs, impairments and loss on disposal of assets, litigation (recoveries)/charges, net and LIFO charges/(credits), which are difficult to predict and estimate and are primarily dependent on future events. Please note that the unavailable reconciling items could significantly impact our future financial results.

Cardinal Health, Inc. and Subsidiaries

Use of Non-GAAP Measures

This presentation contains financial measures that are not calculated in accordance with U.S. generally accepted accounting principles ("GAAP"). In general, the measures exclude items and charges that (i) management does not believe reflect Cardinal Health, Inc.'s (the "Company") core business and relate more to strategic, multi-year corporate activities; or (ii) relate to activities or actions that may have occurred over multiple or in prior periods without predictable trends. Management uses these non-GAAP financial measures internally to evaluate the Company's performance, evaluate the balance sheet, engage in financial and operational planning and determine incentive compensation.

Beginning in fiscal 2015, the Company will exclude last-in, first-out ("LIFO") inventory charges/(credits)[6] from its non-GAAP earnings, for consistency with the presentation by some of its peers. The Company did not record any LIFO charges or credits in the periods presented.

Management provides these non-GAAP financial measures to investors as supplemental metrics to assist readers in assessing the effects of items and events on its financial and operating results and in comparing the Company's performance to that of its competitors. However, the non-GAAP financial measures used by the Company may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies.

The non-GAAP financial measures disclosed by the Company should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and the financial results calculated in accordance with GAAP and reconciliations to those financial statements set forth above should be carefully evaluated.

Definitions

Non-GAAP Diluted EPS from Continuing Operations and growth rate calculation[1]: non-GAAP earnings from continuing operations divided by diluted weighted-average shares outstanding.

Non-GAAP Operating Earnings: operating earnings excluding (1) restructuring and employee severance[2], (2) amortization and other acquisition-related costs[3], (3) impairments and loss on disposal of assets[4], (4) litigation (recoveries)/charges, net[5], (5) LIFO charges/(credits), (6) Other Spin-Off costs[7] and (7) Gain on sale of CareFusion stock.

Non-GAAP Operating Earnings Margin Rate: current period non-GAAP operating earnings divided by revenue.

[1] Except for compound annual growth rates (CAGR), growth rates in this presentation are determined by dividing the difference between current period results and prior period results by prior period results. CAGR is determined by subtracting one from ((the ending value divided by the beginning value) raised to the power of (one divided by the number of years)).

[2] Programs by which the Company fundamentally changes its operations such as closing and consolidating facilities, moving manufacturing of a product to another location, production or business process sourcing, employee severance (including rationalizing headcount or other significant changes in personnel) and realigning operations (including realignment of the management structure of a business unit in response to changing market conditions).

[3] Costs that consist primarily of amortization of acquisition-related intangible assets, transaction costs, integration costs and changes in the fair value of contingent consideration obligations.

[4] Asset impairments and losses from the disposal of assets not eligible to be classified as discontinued operations are classified within impairments and loss on disposal of assets within the consolidated statements of earnings.

[5] Loss contingencies related to litigation and regulatory matters and income from favorable resolution of legal matters.

[6] The inventories of the Company's core pharmaceutical distribution facilities in the Pharmaceutical segment are valued at the lower of cost, using the LIFO method, or market. These charges or credits are included in cost of products sold, and represent changes in the Company's LIFO inventory reserve.

[7] Costs incurred in connection with our Spin-Off of CareFusion which are included in distribution, selling, general and administrative expenses.
