IQVIA Ranked No. 1 Pharmaceutical Technology Provider by Everest Group

RESEARCH TRIANGLE PARK, N.C. – August 17, 2026 – IQVIA (NYSE:IQV), a leading global provider of clinical research services, commercial insights and healthcare intelligence to the life sciences and healthcare industries, today announced that it has been ranked No. 1 in Everest Group's "Top 50™ Pharmaceutical Technology Providers" report for 2026.

IQVIA earned the highest overall score among the 50 providers evaluated, receiving 96.8 out of 100. The ranking recognizes IQVIA's broad technology coverage across the pharmaceutical value chain and its ability to support complex, highly regulated life sciences environments.

IQVIA was the only provider in the ranking with technology coverage across all six pharmaceutical value-chain areas assessed: drug discovery and research, clinical development, manufacturing operations, sales and marketing, supply chain and distribution and pharmacovigilance and safety.

This breadth of coverage helps customers connect capabilities across the product lifecycle, make better decisions and execute more effectively. IQVIA combines proprietary data and content, deep life sciences expertise, advanced technology and longstanding experience operating in highly regulated, privacy-sensitive environments to help customers address complex challenges with greater confidence. Biopharma customers are looking for more than individual technologies. They demand solutions that work together and a partner that understands the realities of their business.
