Zynex Medical Establishes $400,000 Credit Facility

LITTLETON, Colo. — Oct. 6, 2005 — Zynex Medical Holdings, Inc. (OTCBB: ZYNX), a provider of pain management systems and electrotherapy products for medical patients with functional disability, today announced that it has secured a $400,000 credit facility with Silicon Valley Bank, the primary operating subsidiary of Silicon Valley Bancshares (NASDAQ: SIVB). The new credit line will pay off existing obligations and provide additional capital to expand the Company's sales, marketing and support efforts related to its standard electrotherapy products and proprietary NeuroMove™ Stroke Recovery System.

"We are pleased to establish this new credit facility and partnership with Silicon Valley Bank," stated Zynex President and Chief Executive Officer Thomas Sandgaard. "This facility will enable Zynex to substantially accelerate its sales and marketing initiatives and the roll-out of our flagship NeuroMove™ stroke recovery product."

"Zynex is a rapidly growing Denver-area company addressing a large market opportunity. We are pleased to play a role in helping the company meet its objectives and growth plans," said Kevin Grossman, Senior Relationship Manager of Silicon Valley Bank's Boulder Colorado office.

The NeuroMove™ system increases the functionality of many stroke victims by teaching the healthy parts of the brain to compensate for damaged areas. The NeuroMove™, which is significantly more sensitive than most diagnostic equipment, monitors muscle activity and selects signals from the brain indicating that the patient is attempting to move a certain muscle. It then introduces the actual movement through electrical stimulation. Eventually the connection between the brain and muscle can often be reestablished. The NeuroMove™ (www.neuromove.com) also can be used to treat spinal cord injuries.

About Zynex
Zynex Medical Holdings, Inc., (www.zynexmed.com), a leading provider of therapeutic devices for patients with functional disability through the creation, distribution, and marketing of electrotherapy devices since 1996, strives to uphold its mission to improve the quality of life of patients suffering from debilitating pain or illness by providing innovative technology. Utilizing a unique combination of electromyographic (EMG) technology combined with a system of instruction and reinforcement, including electrical muscle stimulation (EMS), Zynex offers new treatment options to post-stroke and spinal injury patients.
