Allocated stockholders' equity is determined on the basis of an internal allocation formula that reflects the volume and risk components of the business and aligns with our target capital levels for regulatory and rating agency purposes. We modify this formula periodically to recognize changes in the views of capital requirements.

Unum Group Financial Results by Segment

We measure and analyze our segment performance on the basis of "adjusted operating revenue" and "adjusted operating income" or "adjusted operating loss", which differ from total revenue and income before income tax as presented in our consolidated statements of income due to the exclusion of investment gains and losses and amortization of the cost of reinsurance as well as certain other items as specified in the following pages. Investment gains or losses primarily include realized investment gains or losses, expected investment credit losses, and gains or losses on derivatives. These performance measures are in accordance with GAAP guidance for segment reporting, but they should not be viewed as a substitute for total revenue, income before income tax, or net income.

Adjustment Related to Unrealized Investment Gains and Losses						104.2	19.7	84.5
Consolidated						$ 44,903.9	$ 13,114.2	$ 31,789.7

The adjustment related to unrealized investment gains and losses reflects the changes that would be necessary to policyholder liabilities if the unrealized investment gains and losses related to the corresponding available-for-sale securities had been realized. Changes in this adjustment are primarily due to movements in credit spreads and U.S. Treasury rates.

Appendix to Statistical Supplement

2022 Significant Items

- None.

2021 Significant Items

- Third quarter of 2021 reserve assumption updates resulting in a reserve reduction of $215.0 million before tax, or $169.9 million after tax, in our Unum US group long-term disability product line and reserve increases of $2.1 million, $6.4 million, and $25.1 million before tax, or $1.7 million, $5.1 million, and $19.8 million after tax, in our Closed Block long-term care, Closed Block individual disability, and Closed Block group pension product lines, respectively.
- Third quarter of 2021 impairment loss of $12.1 million before tax, or $9.6 million after tax, on previously capitalized internal-use software that we no longer plan to utilize.
- Second quarter of 2021 cost related to the early retirement of debt of $67.3 million before tax, or $53.2 million after tax.
- Second quarter of 2021 impairment loss of $13.9 million, or $11.0 million after tax, on a right-of-use (ROU) asset related to an operating lease for office space that we do not plan to continue using to support our general operations.
- Second quarter of 2021 U.K. tax rate increase from 19 percent to 25 percent, effective April 1, 2023, which resulted in $24.2 million of additional tax expense through continuing operations for the revaluation of our deferred tax assets and liabilities.
- In December 2020, we completed the first phase of a reinsurance transaction, pursuant to which Provident Life and Accident Insurance Company, The Paul Revere Life Insurance Company, and Unum Life Insurance Company of America, wholly-owned domestic insurance subsidiaries of Unum Group, and collectively referred to as "the ceding companies", each entered into separate reinsurance agreements with Commonwealth Annuity and Life Insurance Company (Commonwealth), to reinsure on a coinsurance basis effective as of July 1, 2020, approximately 75 percent of the Closed Block individual disability business, primarily direct business written by the ceding companies. On March 31, 2021, we completed the second phase of the reinsurance transaction, pursuant to which the ceding companies and Commonwealth amended and restated their respective reinsurance agreements to reinsure on a coinsurance and modified coinsurance basis effective as of January 1, 2021, a substantial portion of the remaining Closed Block individual disability business that was not ceded in December 2020, primarily business previously assumed by the ceding companies.

  In December 2020, Provident Life and Casualty Insurance Company (PLC), also a wholly-owned domestic insurance subsidiary of Unum Group, entered into an agreement with Commonwealth whereby PLC will provide a 12-year volatility cover to Commonwealth for the active life cohort (ALR cohort). On March 31, 2021, PLC and Commonwealth amended and restated this agreement to incorporate the ALR cohort related to the additional business that was reinsured between the ceding companies and Commonwealth as part of the second phase of the transaction. As part of the amended and restated volatility cover, PLC received a payment from Commonwealth of approximately $18 million.

  In connection with the second phase of the reinsurance transaction, Commonwealth paid a total ceding commission to the ceding companies of $18.2 million. The ceding companies transferred assets of $767.0 million, which consisted primarily of cash and fixed maturity securities. In addition, we recognized the following in the first quarter of 2021 related to the second phase:

  - Net realized investment gains totaling $67.6 million, or $53.4 million after tax, related to the transfer of investments.
  - Increase in benefits and change in reserves for future benefits of $133.1 million, or $105.1 million after tax, resulting from the realization of previously unrealized investment gains and losses recorded in accumulated other comprehensive income.
  - Transaction costs totaling $6.2 million, or $5.0 million after tax.
  - Reinsurance recoverable of $990.0 million related to the policies on claim status (DLR cohort).
  - Payable of $307.2 million related to the portfolio of invested assets associated with the business ceded on a modified coinsurance basis.
  - Cost of reinsurance, or prepaid reinsurance premium, of $43.1 million related to the DLR cohort.
  - Deposit asset of $5.0 million related to the ALR cohort.

2020 Significant Items

- In connection with the first phase of the previously-mentioned reinsurance transaction, the ceding companies paid a total cash ceding commission to Commonwealth of approximately $438 million and transferred additional assets consisting primarily of fixed maturity securities and cash totaling $6,669.8 million. PLC received a payment of $62 million from Commonwealth related to the 12-year volatility cover for the business reinsured during the first phase of the transaction. In addition, we recognized the following in the fourth quarter of 2020 related to the first phase:

    - Net realized investment gain of $1,302.3 million before tax, or $1,028.8 million after tax, related to the transfer of investments.
    - Increase in benefits and change in reserves for future benefits of $1,284.5 million, or $1,014.7 million after tax, resulting from the realization of previously unrealized investment gains and losses recorded in accumulated other comprehensive income.
    - Transaction costs totaling $21.0 million, or $16.6 million after tax.
    - Net tax benefit of $36.5 million.
    - Reinsurance recoverable of $6,141.5 million representing the ceded reserves related to the DLR cohort.
    - Cost of reinsurance, or prepaid reinsurance premium, of $815.7 million related to the DLR cohort, of which we recognized amortization expense of $2.6 million, or $2.0 million after tax.
    - Deposit asset of $88.2 million related to the ALR cohort.

- Fourth quarter of 2020 reserve assumption updates resulting in reserve increases of $151.5 million and $17.5 million before tax, or $119.7 million and $13.8 million after tax, in our Closed Block long-term care and Closed Block group pension product lines, respectively.
- In December 2020, Northwind Holdings redeemed the remaining $35.0 million of principal on the Northwind notes, and was released of any contractual collateral requirements.
- Third quarter of 2020 costs related to organizational design update of $23.3 million before tax and $18.6 million after tax.
- Second quarter of 2020 impairment loss of $12.7 million, or $10.0 million after tax, on a ROU asset related to an operating lease for office space that we do not plan to continue using to support our general operations.
- In June 2016, the Financial Accounting Standards Board (FASB) issued an update that amended the guidance on the impairment of financial instruments. This update added an impairment model known as the current expected credit loss model that is based on expected losses rather than incurred losses, and will generally result in earlier recognition of allowances for losses. This new model applies to financial instruments such as mortgage loans, fixed maturity securities classified as held-to-maturity, and certain receivables. This update also prospectively modified the other-than-temporary impairment model used for available-for-sale fixed maturity securities such that credit losses are recognized as an allowance rather than as a reduction in the amortized cost of the security. We adopted this update effective January 1, 2020 using a modified retrospective approach through a cumulative-effect adjustment as of January 1, 2020 which resulted in a decrease to retained earnings of $18.9 million, a decrease to mortgage loans of $8.3 million, a decrease in reinsurance recoverable of $1.8 million, a decrease in accounts and premiums receivable of $13.5 million, a decrease in deferred income tax liability of $5.0 million, and an increase to other liabilities of $0.3 million.

Non-GAAP Financial Measures

We analyze our performance using non-GAAP financial measures which exclude or include amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. We believe the following non-GAAP financial measures are better performance measures and better indicators of the revenue and profitability and underlying trends in our business:

- Consolidated adjusted operating revenue, which excludes investment gains or losses;
- After-tax adjusted operating income or loss, which excludes investment gains or losses and amortization of the cost of reinsurance as well as certain other items, as applicable;
- Adjusted operating return on equity, which is calculated using after-tax adjusted operating income or loss and excludes from equity the unrealized gain or loss on securities and net gain on hedges;
- Leverage ratio, which excludes the unrealized gain or loss on securities and net gain on hedges; and
- Book value per common share, which is calculated excluding accumulated other comprehensive income (loss) (AOCI).

Investment gains or losses primarily include realized investment gains or losses, expected investment credit losses, and gains or losses on derivatives. Investment gains or losses and unrealized gains or losses on securities depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our Company. Leverage ratio and book value per common share excluding certain components of AOCI, certain of which tend to fluctuate depending on market conditions and general economic trends, are important measures.

As previously discussed, we have exited a substantial portion of our Closed Block individual disability product line through the two phases of the reinsurance transaction that were executed in December 2020 and March 2021, respectively. As a result, we exclude the amortization of the cost of reinsurance that was recognized upon the exit of the business related to the DLR cohort of policies. We believe that the exclusion of the amortization of the cost of reinsurance provides a better view of our results from our ongoing businesses.

We may at other times exclude certain other items from our discussion of financial ratios and metrics in order to enhance the understanding and comparability of our operational performance and the underlying fundamentals, but this exclusion is not an indication that similar items may not recur and does not replace net income or net loss as a measure of our overall profitability.

For a reconciliation of the most directly comparable GAAP measures to these non-GAAP financial measures, refer to the "Reconciliation of Non-GAAP Financial Measures" beginning on page 16.3, other than book value per common share, which is presented on page 2.

[3] Excludes unrealized gain (loss) on securities and net gain on hedges and is calculated using the stockholders' equity balances presented on page 16.7. Due to the implementation of a FASB update for which the beginning balances of 2020 for certain stockholders' equity line items were adjusted, we are computing the average allocated equity for 2020 using internally allocated equity that reflects the adjusted beginning balances at January 1, 2020. As a result, average equity for the year ended December 31, 2020 for certain of our segments will not compute using the historical allocated equity at December 31, 2019.

Reconciliation of Non-GAAP Financial Measures - Continued

Average allocated equity is computed as follows:

	6/30/2022	3/31/2022	12/31/2021	6/30/2021	3/31/2021	12/31/2020	12/31/2019
