Intrusion Inc. Launches the P.O.S.S.E. Program, Expanding the Deployment of Shield Technology

2026-02-11

PLANO, TX / **ACCESS Newswire** / February 11, 2026 / Intrusion Inc. (NASDAQ:INTZ) ("Intrusion" or the "Company"), a leader in cyberattack prevention solutions, today announced the launch of its P.O.S.S.E. (Protecting Our Sheriff's Security Everywhere) Program that utilizes the Company's Shield technology to help protect law enforcement from cyber threats.

The P.O.S.S.E. Program deploys the Shield On-Premise solution leveraging Intrusion's 8.5 billion IP reputation database to identify and block malicious activity. Unlike traditional solutions that require specialized staff, P.O.S.S.E. devices operate autonomously to block harmful inbound and outbound communications, identify vulnerabilities and active attackers, and generate actionable reports that law enforcement can readily understand. The Program achieved 100% adoption during its fourth quarter 2025 pilot in Texas, where Intrusion's technology identified and stopped dozens of active threats.

The P.O.S.S.E. Program is now scaling across Texas, Missouri, Oklahoma, and Iowa through a partnership with MyFlare Alert. This partnership provides distribution access to hundreds of sheriff departments, schools, and government facilities through a Sheriff-to-Sheriff validation model where sheriffs complete the assessment and either deploy or pass the device to a peer department.

"We are proud to announce the launch of the P.O.S.S.E. Program, which will help protect law enforcement from the growing number of cyber threats," said Tony Scott, CEO of Intrusion Inc. "The Sheriff departments here in Texas face the same number of cyber threats as large enterprises but operate with a fraction of the budget and staff. The P.O.S.S.E. Program will provide Sheriff departments with the threat intelligence they need to ensure that local public safety infrastructure is protected. We look forward to working closely with MyFlare Alert to help expand this

program and increase the adoption of our technology in other states outside of Texas."

"We learned quickly that even the extensive cybersecurity we already have wasn't enough," said Chanze Fowler, Sheriff of Hartley County, Texas. "The P.O.S.S.E. Program changed the way we think about safety by taking our security to the next level and helping protect the systems our deputies and community rely on every day."

About Intrusion Inc.

Intrusion Inc. is a cybersecurity company based in Plano, Texas, specializing in advanced threat intelligence. At the core of its capabilities is TraceCop, a proprietary database that catalogs the historical behavior, associations, and reputational risk of IPv4 and IPv6 addresses, domain names, and hostnames. Built on years of gathering global internet intelligence and supporting government entities, this data forms the backbone of Intrusion's commercial solutions.

Its most recent solution is Intrusion Shield - a next-generation network security platform designed to detect and prevent threats in real time. In observe mode, Shield delivers analytical insights powered by Intrusion's exclusive data, helping organizations identify unseen patterns and previously unknown risks. In protect mode, it monitors traffic flow and automatically blocks known malicious and unknown connections from entering or exiting the network - providing a powerful defense against Zero-Day threats and ransomware. By integrating Shield into a network, organizations can elevate their overall security posture and enhance the performance of their broader cybersecurity architecture.

Cautionary Statement Regarding Forward-Looking Information

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which statements involve substantial risks and uncertainties. All statements other than statements of historical facts contained herein, including statements regarding our financial position; our ability to continue our business as a going concern; our business, sales, and marketing strategies and plans; our ability to successfully market, sell, and deliver our Intrusion Shield commercial product and solutions to an expanding customer base; are forward-looking statements. In some cases, you can identify forward-looking statements because they contain words such as "anticipate," "believe," "contemplate," "continue," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "will," or "would" or the negative of these words or other similar terms or expressions. Forward-looking statements contained in this press release include, but are not limited to, such statements.

You should not rely on forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this press release primarily on our current expectations and projections about

future events and trends that we believe may affect our business, financial condition, and operating results. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties, and other factors described in our filings with the Securities and Exchange Commission, including but not limited to our most recent annual report on Form 10-K and quarterly reports on Form 10-Q, as the same may be updated from time to time.

The forward-looking statements made herein relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date hereof or to reflect new information or the occurrence of unanticipated events, except as required by law.
