Intrusion Partner iOne Wins P1.4 Billion Bid for the Commission on Elections Project, Securing National and Local Polls in the Philippines

4/17/2024

MANILA, PHILIPPINES and PLANO, TX / ACCESSWIRE / April 17, 2024 / Intrusion Inc. (NASDAQ:INTZ), a leading provider of cybersecurity solutions, in partnership with iOne Resources, a leading systems integrator and managed IT network solutions provider, announced a notice of award to supply the Secure Electronic Transmission Services (SETs) for the 2025 midterm elections.

iOne's Resources in partnership with Ardent Networks, a local IT Distribution Company, will include a portfolio of networking and security vendors from Intrusion, Fortinet, Teltonika, Cisco, Akamai, Starlink, and Dell.

"We believe Intrusion will significantly enhance the cybersecurity posture of the Commission on Elections," said Alberto Catangui, President, and CEO of iOne Resources. "Particularly in safeguarding electoral infrastructure from potential cyberattacks or intrusions."

"The safeguarding of electronic voting is vital to the health of any country," said Tony Scott, CEO of Intrusion. "We are proud to play a key role in maintaining the security of the 2025 elections in the Philippines."

This is the second most expensive contract for the 2025 elections with a total bid price of P1.4 billion (approximately \$25 million USD). SETs is scheduled to be fully operational by November 2024 and will begin contributing to earnings in the second half of 2024.

About Intrusion Inc.

Intrusion, Inc. is a cybersecurity company based in Plano, Texas. The Company offers its customers access to its exclusive threat intelligence database containing the historical data, known associations, and reputational behavior of over 8.5 billion IP addresses. After years of gathering global internet intelligence and working exclusively with government entities, the Company released its first commercial product in 2021. Intrusion Shield is designed to allow businesses to incorporate a Zero Trust, reputation-based security solution into their existing infrastructure. Intrusion Shield observes traffic flow and instantly blocks known malicious or unknown connections from both entering or exiting a network to help protect against Zero-Day and ransomware attacks. Incorporating Intrusion Shield into a network can elevate an organization's overall security posture by enhancing the performance and decision-making of other solutions in its cybersecurity architecture.
