

NEWS RELEASE

Strategic Initiatives Increase INTRUSION Shield Exposure to a Wide Spectrum of Organizations Building Out Their Zero Trust Architecture

11/11/2021

New Advisory Board Formed; New Enhancements to Shield; and, New Partners Onboarded that Deliver Expanded Coverage

PLANO, Texas, Nov. 11, 2021 (GLOBE NEWSWIRE) -- INTRUSION (Nasdaq: INTZ) announced today that it has rolled out several strategic initiatives to provide greater exposure of INTRUSION Shield as an integral component of any organization's Zero Trust Architecture. Shield relies on its unique proprietary IP reputation-based threat intelligence database to make pass/block decisions on inbound and outbound network traffic in real-time. Shield does not rely on traditional, or next-gen, firewall packet and application filtering engines as other cybersecurity solutions do. Instead, it uses a novel means of protecting organizations from Zero-Day and malware-free attacks by only permitting trusted connections to proceed which fits directly into the notion of Zero Trust.

INTRUSION recently shipped the latest release of its award-winning Shield product, and the company onboarded new Value-Added Distributor (VAD) channel partners, including Liquid PC and Forequest Technologies, to extend its reach. The company also formed a new Advisory Board comprised of industry icons Greg Akers, Eric Jackson, and Vice Admiral TJ White, USN, Retired.

"Over the past couple of years we've seen a world finally waking up to understand that cyberattacks aren't merely intriguing storylines on popular TV shows and movies, but every-day, real-life potentially catastrophic events on everything that matters including critical infrastructure, supply chains, and schools with devastating consequences to the operation and bottom line of those impacted," said Gary Davis, Chief Sales & Marketing Officer at

INTRUSION. "As 2021 winds down, we've accelerated endeavors that enable us to meet the demands of a wide variety of organizations building out their Zero Trust Architecture without taxing an already overwhelmed cybersecurity or IT staff."

Below are further details about the Company's strategic initiatives.

INTRUSION Forms New Advisory Board

INTRUSION has established an Advisory Board with the charter of assisting the company in the evaluation of its research and development, roadmap, industry standing, business activities, and offer advice on improvements. The Advisory Board members are as follows:

- Greg Akers was the Senior Vice President & CTO of Advanced Security Research & Government as well as Chief Technology Officer within the Security & Trust Organization (STO) group at Cisco. A major focus of his group was to expand security awareness and launch product resiliency initiatives throughout Cisco's development organization to deliver high-quality and secure products to customers. Before joining Cisco in 1993, Akers' career included more than 15 years of designing, building, and running large networks for Fortune 100 companies.
- Eric Jackson, retired FBI Special Agent in Charge of the Dallas field office had a career in law enforcement spanning almost 22 years, which included experiences fighting terrorism, fraud, and cybercrime. Jackson currently serves as the Chief Security Officer and Risk Mitigation Executive for TBK Bank, SSB, with locations in Dallas, Texas, Iowa, Kansas, Colorado, Illinois, and New Mexico.
- Vice Admiral TJ White, USN, Retired is a 30-plus year national security practitioner, strategist, and cyber operations expert leading joint military formations and combined intelligence community organizations. He has commanded at all levels within the Navy and Joint Service, most recently as the Commander, United States Fleet Cyber Command / United States TENTH Fleet / United States Navy Space Command and previously as the Commander, United States Cyber National Mission Force / USCYBERCOM.

INTRUSION Launches the Latest release (Version 17.3) of Shield

Shield protects customers from contemporary cyberattacks – especially those stemming from Zero-Day and malware free exploits – as a true bidirectional Zero Trust solution. Among several other enhancements, version 17.3 includes a new dashboard that provides C-level executives with a single pane of glass from which to see the impact that Shield is having on their environment and to help focus their remediation efforts.

INTRUSION Signs Channel Partners to Expand Its Reach

INTRUSION extended its reach by adding to its growing list of channel partners Forequest Technologies and Liquid PC. Forequest Technologies, Paris, France-based, focuses on creating opportunities for INTRUSION Shield in EMEA and Brazil. Liquid PC, headquartered in Portsmouth, New Hampshire, will be INTRUSION Shield's conduit into CDW Corporation – a top tier technology distribution company.

Concluded Davis, "We've made solid progress in all the areas that matter as a cybersecurity software startup. As we finish this year and look forward to 2022 our confidence continues to grow as we hit our stride."

About INTRUSION, Inc.

INTRUSION, Inc. (NASDAQ: INTZ) protects any-sized company by leveraging advanced threat intelligence with real-time artificial intelligence to kill cyberattacks as they occur – including zero-days. INTRUSION's solution families include INTRUSION Shield, an advanced cyber-defense solution that kills cyberattacks in real-time using artificial intelligence (AI) and advanced threat intelligence; INTRUSION TraceCop™ for identity discovery and disclosure; and INTRUSION Savant™ for network data mining and advanced persistent threat detection.
