Operating Cash Flow Bridge (2018 – LTM Q2'22)

- ✓ Gross margin increased to 42.8% during LTM June'22, up from 31.5% at the end of 2019. Three main factors have contributed to the improved margin profile:
  - ➢ Step up in gross margin from structural and sustainable operational improvements related to automation initiatives

  - ➢ Operating leverage on higher revenues have more than offset depreciation, labor, and other indirect manufacturing costs

- ✓ Tecnoglass has established a strong record of cash flow generation as a result of increased profitability, better working capital management, reduced interest expenses and a more favorable mix of revenues
- ✓ Significant DSO improvement, from 90 in 2018 to 73 as of Q2'22, driven by improved collection efforts and a higher ix of revenues from single-family residential, which includes up front payments, shorter sales cycles and no retainage; Company allows for 10-15 day transit times.
- ✓ Interest expense savings achieved through reduction in both debt outstanding and weighted average interest rate
- ✓ Anticipate strong cash flow for FY2022, further strengthening financial flexibility to execute expected growth

Stronger profitability and significant improvement in working capital metrics driving record cash flow generation and lowest net leverage (Net Debt / LTM Adjusted EBITDA) levels in Company history
