We have not reconciled the forward-looking adjusted EBITDA ranges and adjusted EBITDA margin presented above and discussed on the teleconference call to net income, nor the forward-looking non-GAAP effective income tax rate discussed on the teleconference call, to comparable GAAP measures because applicable information for future periods, on which these reconciliations would be based, is not readily available due to uncertainty regarding, and the potential variability of, depreciation and amortization, interest expense, taxes, non-cash stock-based compensation expense and other items. Accordingly, reconciliations of the forward-looking adjusted EBITDA ranges to net income, the forward-looking adjusted EBITDA margin to net income margin, and the forward-looking non-GAAP effective income tax rate to the GAAP effective income tax rate are not available at this time without unreasonable effort.

Use of Non-GAAP Financial Information

To supplement our financial information presented in accordance with generally accepted accounting principles in

the United States ("GAAP"), we present certain non-GAAP financial measures in this press release and on the related teleconference call, including adjusted EBITDA, non-GAAP net income, adjusted gross profit, adjusted gross margin, adjusted sales and marketing expenses, adjusted total administrative expenses, adjusted research and development expenses, adjusted total research and development costs, adjusted EBITDA margin, non-GAAP effective income tax rate, free cash flow and free cash flow margin. Management uses these non-GAAP financial measures as supplemental measures to review and assess the performance of our core business operations and for planning purposes. We define (i) adjusted EBITDA as net income plus interest expense, taxes, depreciation and amortization, non-cash stock-based compensation expense and certain transaction expenses that are not core to our operations (if any), less any gain on modification of the naming rights agreement, (ii) non-GAAP net income as net income plus non-cash stock-based compensation expense and certain transaction expenses that are not core to our operations (if any), less any gain on modification of the naming rights agreement, all of which are adjusted for the effect of income taxes, (iii) adjusted gross profit as gross profit plus applicable non-cash stock-based compensation expense, (iv) adjusted gross margin as gross profit plus applicable non-cash stock-based compensation expense, divided by total revenues, (v) each adjusted expense item as the GAAP expense amount less applicable non-cash stock-based compensation expense, (vi) adjusted total research and development costs as total research and development costs (including the capitalized portion) less applicable non-cash stock-based compensation (including the capitalized portion), (vii) adjusted EBITDA margin as adjusted EBITDA (calculated as described in clause (i)) divided by total revenues, (viii) non-GAAP effective income tax rate as the provision for income taxes plus the income tax effect on non-GAAP adjustments divided by non-GAAP net income (calculated as described in clause (ii)) plus the provision for income taxes and the income tax effect on non-GAAP adjustments, (ix) free cash flow as net cash provided by operating activities less purchases of intangible assets and purchases of property and equipment (which we also refer to as "capital expenditures" or "cap ex"), and (x) free cash flow margin as free cash flow (calculated as described in clause (ix)) divided by total revenues. The non-GAAP financial measures presented in this press release and discussed on the related teleconference call provide investors with greater transparency to the information used by management in its financial and operational decision-making. We believe these metrics are useful to investors because they facilitate comparisons of our core business operations across periods on a consistent basis, as well as comparisons with the results of peer companies, many of which use similar non-GAAP financial measures to supplement results under GAAP. In addition, adjusted EBITDA is a measure that provides useful information to management about the amount of cash available for reinvestment in our business, paying dividends, repurchasing common stock and other purposes. Management believes that the non-GAAP measures presented in this press release and discussed on the related teleconference call, when viewed in combination with our results prepared in accordance with GAAP, provide a more complete understanding of the factors and trends affecting our business and performance.

The non-GAAP financial measures presented in this press release and discussed on the related teleconference call are not measures of financial performance under GAAP and should not be considered a substitute for net income,

gross profit, gross margin, research and development expenses, sales and marketing expenses, administrative expenses, total research and development costs and GAAP effective income tax rate. Non-GAAP financial measures have limitations as analytical tools, and when assessing our operating performance, you should not consider these non-GAAP financial measures in isolation, or as a substitute for the consolidated statements of income data prepared in accordance with GAAP. The non-GAAP financial measures that we present may not be comparable to similarly titled measures of other companies, and other companies may not calculate such measures in the same manner as we do.
