

INVESTOR PRESENTATION

2026 Moody Capital Solutions Disruptive Growth & Life Sciences Conference

September 9, 2026

Safe Harbor Statement

Information included or incorporated by reference in this presentation may contain forward-looking statements. This information may involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different than the future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words “may,” “should,” “expect,” “anticipate,” “estimate,” “believe,” “intend” or “project” or the negative of these words or other variations on these words or comparable terminology.

Examples of forward-looking statements include, but are not limited to, statements regarding efforts to grow revenue, expectations regarding fulfillment of backlog, future benefits to operating margins and the adequacy of cash resources. Actual events or results may differ materially from those discussed in forward-looking statements as a result of various factors, including, without limitation, the risks outlined under “Risk Factors” in the Information Statement contained within our Form 10-K filed with the SEC on March 26, 2026. In light of these risks and uncertainties, there can be no assurance that the forward-looking statements contained in this presentation will in fact be accurate. Further, we do not undertake any obligation to publicly update any forward-looking statements. As a result, you should not place undue reliance on these forward-looking statements.

Mtron Overview

Mtron (NYSE AM: MPTI) is a NYSE American publicly traded corporation

- Formed in 1965
- Aerospace and Defense Focused Since 2004 Acquisition
- Listed NYSEAM in October 2022 via Spin Off at ~\$13 (\$10.85-\$102.00 Range)
- 4.3 mm Shares Outstanding¹, No Debt, and Free Cash Flow Generation
- Raised \$70 mm over past six months and has approx. \$94 mm¹ of cash on the B/S
- Broad employee ownership to align interest with shareholders

Mtron Profile

- American Defense Contractor in High Growth Niche Markets
- Specialist in Robust Engineered Microwave & RF Applications
- One of the few vertically integrated RF companies in the US
- Positioned to access long term value creation opportunities
- Platform for Growth Through Mergers and Acquisitions

¹ After close of the Rights Offering on 4/27/2026.

Investment Highlights

1

Strong revenue growth and cash generation

2

Attractive end markets with long-term contracts and loyal customers

3

Unique capability to manufacture in U.S. for mission critical supply chains

4

Compelling financials with organic and inorganic growth strategy

5

Have production capacity and management team to support continued growth

Mtron At A Glance

Vertically Integrated RF Solutions

Highly-engineered, high reliability precision components and solutions including Filters, Oscillators, Resonators, and Innovative RF Solutions

Blue-Chip Customer Base

Diverse global customer base including industry leaders in the Aerospace & Defense, Avionics, Space, and Industrials sectors

Strong Market Performance

Delivering strong returns to shareholders of 561% since spin-off on October 7, 2022, indicative of our unique strategy and strong execution

Management Team and Board

Tenured Management Team and Board Provides Mtron with Decades of Experience and Leadership

A History of Leadership and Innovation

For Over 60 Years, Mtron Has Been a Leader in Supporting Advanced Electronics

2024

Mtron launches its first space –borne IMA

2022

Mtron launches Planar Filter Product Line and High frequency, low noise OCXO family

2017

Mtron introduces its first electronical vibration compensated OCXO

2002

Mtron purchases assets of Champion Technologies (formerly Motorola) adding VCXO, TCXO and timing solutions

1973

PTI supplies the first monolithic filters used in space

2022

Mtron completes separation from The LGL Group, Inc., becoming an independent, publicly traded company

2020

Mtron launches Integrated Microwave Assembly (IMA)

2004

Mtron acquires PTI

1976

Lynch Corporation (predecessor to The LGL Group, Inc.) acquires Mtron

1965

Mtron and Piezo Technology (PTI) are organized separately

Unique Product Portfolio...

Filters

- Applications within Avionics, Space, Communications, Electronic Warfare, Instrumentation, and Radar
- Products include Crystal, LC, Cavity, Planar, Waveguide, Ceramic, Duplexer, Multiplexer and Switched Filters

Oscillators

- Applications within Avionics, Communications, Electronic Warfare, Instrumentation, and Radar
- Products include XO, TCXO, VCXO, OCXO, e-Vibe™ OCXO

Resonators

- Applications within Avionics, Space, Communications, Electronic Warfare, Instrumentation, and Radars
- Vertically integrated into crystal filters and oscillators

Innovative RF Solutions

- Spanning frequencies from 10MHz to 50GHz, multiple components integrated into SWaP-C assemblies

FY'25 Revenue Split by Product

New Product Development

Increased R&D and Capex Spend Drive Organic Topline Growth in the Near-Term

Constant Innovation with Strategic Targeting of Larger Opportunities

- ~30% of FY'25 Revenue comes from products introduced since 2021
- New product development is a key component of strategy with **development tailored to deepen customer relationships**
- Number of products >\$500k annually increased ~50%
- 35.2% increase in ASP since 2021

Servicing High Growth Market Applications

Precision-Guided Munitions

Radar

Electronic Warfare

Commercial Aerospace

UAV / Drones

Space & SATCOM

U.S. DoW Rewriting Procurement Rules

Modern Conflicts Are Driving Increased Demand for Advanced Weapons Systems

Technology Driving Rapid Change

Modern warfare based on sensors, ai, control of electromagnetic spectrum, autonomous systems and precision munitions

- Missile and precision weapon usage has exceeded years of historical production capacity
- Manufacturing infrastructure designed for lower peacetime procurement volumes
- U.S. and allied forces focusing on stockpile replenishment and expansion
- Increasing importance of networked battlefield systems and integrated targeting capabilities

U.S. DoW Response

- Contracting long-term agreements to dramatically expand production capacity for precision-guided weapons
- Accelerating industrial base expansion
- DoW supporting development of more nimble suppliers
- Increasing investment in networked communications and targeting systems

Implications for Defense Suppliers

Defense contractors may benefit from:

- Higher production volumes
- Longer production contracts
- Sustained investment in advanced defense technologies
- Greater DoW support for innovative small to mid-tier players

Structural increase in defense production capacity is expected to drive demand across the defense supply chain.

Munitions Depletion is Real

CSIS study on Munitions Depletion Highlights Pressure on US Stockpile

Under-investment and Iran conflict has cost US dearly in several critical munitions

Under Secretary Feinberg’s 7-year missile framework agreements moving in right direction to stimulate investment required

Mtron is key supplier to many of these programs and should benefit long-term from this renewed focus

Unit cost (\$ in millions)

Delivery timeline (months)

Product Applications: Radar

Precision Surveillance Technology to Ensure Security

- Hypersonic missiles and drones require highly advanced radars which drive the need for high-performing filters and oscillators
- **Both commercial and military aircraft utilize Mtron components** on their on-board radars

Radar systems use between \$700 and \$9,000 of Mtron content per system.

Product Applications: Commercial Aerospace

Platform Flexibility with Multiple Touchpoints

- ~16 design slots on nearly every Boeing and Airbus commercial airplane
- Provides rugged, proven, reliable oscillators, clocks, and filters in numerous applications, from flight control to navigation
- Serves **multiple end-markets** including smaller regional and business jet markets

Average Mtron content per airplane – approximately \$7,000

Growth Drivers

Expansion Opportunities Across Multiple High Growth Markets

1

Armament and weapon system replenishment driven by global conflicts

2

Modernization programs and new system development driving longer-term defense component/subsystem growth

3

Strong commercial airframe backlog for Airbus and Boeing

4

Expansion into new rapidly growing markets (Space)

5

Strong R&D & manufacturing process investment driving more program capture

Blue-Chip Customer Base

Tenured Industry Relationships With Premier Customers Across Various End Markets

Aerospace & Defense

Avionics

Space

Industrials

More than 70 customers with a 10+ year history

Global Footprint

Strategically Located to Supply Critical National Security Needs With Ample Capacity For Future Growth

Orlando, FL (HQ)

- 71,000 sq. ft.
- AS9100D Design and Manufacturing Facility
- ITAR Registered
- Sales Office

Yankton, SD

- 32,000 sq. ft.
- AS9100D Design and Manufacturing Facility
- ITAR Registered

New Delhi, India

- 13,000 sq. ft.
- ISO 9001:2015 Manufacturing Facility
- MLA - Manufacturing License Agreement for ITAR Compliance

Hong Kong

- Sales Office

Over 100,000 sq. ft. of ITAR registered Design and Manufacturing Space

Avenues for Growth

Mtron's ability and opportunities for growth have expanded

Leverage Customer Relationships

- Build Mtron into a leading supplier of modules, subsystems and components to the Defense and Aerospace industry

Program Focused

Market Driven R&D

- Continue to enhance our ability to provide highly engineered modules and subsystems through increased design expertise

Increase Engineered Content

M&A

- Invest accumulating cash in complementary acquisitions
- Strategic investment where appropriate

Disciplined Approach

Investment, Partnerships and Acquisitions broadening capabilities and increasing earnings.

Investing in Organic Growth

Current facilities can produce approximately \$100 million of revenue and we are investing to scale

Workforce

- **Touch labor** required to scale production of current programs – solderers, RF technicians, maintenance technicians
- **Process engineers** required to expand number of new products we bring online and increase rate of automation
- **Design engineers** required to handle larger volume of RFQs as we

Capital Expenditures

- Brought machining in-house
- Automation – to improve efficiency and margin – 2-3 year payback period
- Test equipment, benches, machines to scale production
- Better instrumentation for tracking and planning
- Lead times from 8 weeks to 9 months depending on type

Manufacturing Capacity

- Currently reworking floor layouts as programs scale
- Have room for expansion in all facilities
- Starting to develop long-term expansion plan

CapEx has increased as percent of sales from 3% to 6-7% as we invest in our growth and margin improvement

Metrics

Significant improvement in key metrics since spin-off 2022

Revenue Growth

Increased from \$8.4M/qtr to \$15.1M/qtr

 **80%**

Gross Margin

Increased from 32% to 44%

 **41%**

Net Income

Increased from \$503K/qtr to \$1,870K/qtr

 **272%**

Adj. EBITDA Margin

Increased from 10.4% to 22.5%

 **116%**

Cash Generation

Increased cash on hand from \$806K to \$96,245K

 **11,842%**

EPS

Increased from \$0.19/share per qtr to \$0.43/share per qtr

 **126%**

Financial Summary

Compelling Financials With Strong Topline Growth And Healthy Margins
