1. Unitranche loans are first lien loans that may extend deeper in a company's capital structure than traditional first lien debt and may provide for a waterfall of cash flow priority among different lenders in the unitranche loan. In certain instances, the Company may find another lender to provide the "first out" portion of such loan and retain the "last out" portion of such loan, in which case, the "first out" portion of the loan would generally receive priority with respect to payment of principal, interest and any other amounts due thereunder over the "last out" portion that the Company would continue to hold. In exchange for the greater risk of loss, the "last out" portion earns a higher interest rate.

2. Excludes fixed rate investments.

Note: As part of CCAP's monitoring process, each of our investments is graded quarterly on a risk scale of 1 to 5. Our assessment is based on the following categories: (1) Involves the least amount of risk relative to cost or amortized cost. Investment performance is above expectations since origination or acquisition. Trends and risk factors are generally favorable, which may include financial performance or a potential exit. (2) Involves a level of risk that is similar to the risk at the time of origination or acquisition. The investment is generally performing as expected, and the risks around our ability to ultimately recoup the cost of the investment are neutral to favorable relative to the time of origination or acquisition. New investments are generally assigned a rating of 2 at origination or acquisition. (3) Indicates an investment performing below expectations where the risks around our ability to ultimately recoup the cost of the investment have increased since origination or acquisition. For debt investments, borrowers are more likely than not in compliance with debt covenants and loan payments are generally not past due. An investment rating of 3 requires closer monitoring. (4) Indicates an investment performing materially below expectations where the risks around our ability to ultimately recoup the cost of the investment have increased materially since origination or acquisition. For debt investments, borrowers may be out of compliance with debt covenants and loan payments may be past due (but generally not more than 180 days past due). Non-accrual status is strongly considered for debt investments rated 4. (5) Indicates an investment performing substantially below expectations where the risks around our ability to ultimately recoup the cost of the investment have substantially increased since origination or acquisition. We do not expect to recover our initial cost basis.
