

press releases

Acal BFi signs Pan European supply agreement with FLIR to offer latest thermal camera cores and to launch revolutionary FLIR Boson™.

20 June 2016

Acal BFi, the European leader in advanced technology solutions, will incorporate FLIR thermal imaging solutions into their product portfolio. “We are thrilled to bring FLIR into our product portfolio and we are already seeing very positive sales activity across Europe for the world-leading FLIR thermal cores including Tau® 2, Quark™ 2, PathFindIR™ II and Vue™.” says Alex Schneider, Business Development Director of Acal BFi’s Imaging division.

Alex goes on to say, “We are particularly excited to be able to offer the groundbreaking FLIR Boson thermal core as part of this new partnership. The combination of size, weight and power (SWaP), state-of-the-art imaging, and wide range of built-in image processing and interface capabilities make Boson a real game changer in the thermal camera core market. It is the first thermal camera core to incorporate a sophisticated, low-power multi-core vision processor unit that helps make Boson the smartest thermal core on the planet. The FLIR range is a perfect fit for our world-class technology offerings.”

FLIR’s XIR™ expandable infrared video processing architecture implemented in Boson, helps OEMs take advantage of advanced image processing and video analytics while keeping power consumption low. Manufacturers of drones, cars, weapons sights and handheld imagers will now have the ability to process video onboard, and allow Boson to do things previous cores could not.

“It is a natural fit to work with Acal BFi due to their extensive expertise in the development and distribution of thermal imaging solutions and applications, built on over 20 years of experience as a leader in this industry,” commented Bill Terre, Vice President FLIR OEM. “Acal BFi understands thermal imaging and integrating thermal imaging into a wide range of applications.”

About Acal BFi

Acal BFi is a European leader in advanced technology solutions, providing marketing, engineering, design, manufacturing and custom services and the only such supplier with an infrastructure to deliver a broad complementary range of specialist products and bespoke solutions across Europe.

Acal BFi is part of the Acal PLC Group, which has two divisions: Design & Manufacturing and Custom Distribution. The majority of its sales come from products and solutions which are created uniquely for a customer. Acal works across a range of technologies, namely Power & Magnetics; Communications & Sensors; Electromechanical; Imaging & Photonics; and Embedded Computers & Displays.

Acal operates through the following wholly-owned businesses: Acal BFi, Contour, Flux, Foss, Hectronic, MTC, Myrra, Noratel, Plitron, RSG, Stortech and Vertec. It has operating companies and manufacturing facilities in a number of markets, including the UK, Germany, France, the Nordic region, Benelux, Italy, Poland, Slovakia and Spain, as well as in Asia (China, India, Sri Lanka, South Korea and Thailand), the US, Canada and South Africa.
