Background on Woodbois

Woodbois Limited (AIM:WBI) is an African focused forestry company, divided into three distinct, but highly complementary divisions comprising the production and supply of sustainable African hardwood products, the trading of hardwood and hardwood products, and a reforestation and carbon credit division.

Woodbois' forestry division has production facilities in Gabon and Mozambique, managing a total of c470,000 hectares of natural forest concessions. The trading division comprises a highly experienced team of timber specialists, who source and supply sustainable timber to a global customer base. Its proprietary technology developed in house, captures, stores and presents data, providing a matching engine to build scale and optimise trading opportunities with its global customer base.

The Company's carbon sequestration and trading division which was formed in March 2021 aims to generate voluntary carbon credits for corporate partners through the delivery of large-scale reforestation projects.

Recognising that its sustainable timber operations is a journey, the Company is committed to providing timely and transparent disclosures as it helps in building trust with stakeholders. The Company has been consistently ranked among the top ten since it was assessed in 2018 by the Zoological Society of London in their annual Sustainability Policy Transparency Toolkit ('SPOTT") ESG policy transparency assessments for timber and pulp organisations.
