Forward-Looking Statements

Certain statements in this presentation contain forward-looking information within the meaning of applicable securities laws in Canada (“forward-looking information”). The words “anticipates”, “believes”, “budgets”, “could”, “estimates”, “expects”, “forecasts”, “intends”, “may”, “might”, “plans”, “projects”, “schedule”, “should”, “will”, “would” and similar expressions are often intended to identify forward-looking information, although not all forward-looking information contains these identifying words.

Forward-looking information is included, but not limited to:The timing and outcome of our challenge is not estimable at this time; This development is expected to enhance our market float and trading liquidity over time, which is a positive outcome for all stakeholders; this strategic move strengthened our balance sheet and positioned us well to execute on our promising M&A pipeline; the transaction also deepens our access to the attractive Pro Dealer customer channel where we anticipate favorable multi-year demand from the new residential and the repair and remodel markets. We expect the transaction to be immediately accretive to Adjusted basic earnings per share and Adjusted EBITDA margin, while moving us closer to our Destination 2028 goals, including the achievement of $3.5 billion in annual run-rate sales through a combination of organic and acquisitions-based growth by 2028; on an organic basis, we anticipate third quarter Adjusted EBITDA will be similar to what we achieved in Q2 2024; acquisition-based growth is expected to build on that performance as we benefit from the inclusion of Woolf's operations for August and September 2024; overall, the inflation and interest rate hikes of recent years are expected to continue to moderately impact residential, repair and remodel, and commercial construction markets in the second half of 2024; despite this, we expect our strategies will continue to support strong and stable sales volumes as we demonstrated in Q1 and Q2 under similar conditions; the size, scale and sophistication of our business model allows us to implement comprehensive initiatives that drive our success and are difficult to replicate by smaller regional competitors; key strategies include our global sourcing program and vendor management programs that provide us access to branded, exclusive, and semi-exclusive products with attractive terms; additionally, our digital engagement initiatives with customers have been effective, with approximately 20% of our transactions occurring online; our proprietary ADENTRA University training programs further ensure that our team is well-equipped to deliver exceptional service and maintain our competitive edge; these strategies are core components of our Destination 2028 plan, which targets an additional $800 million in run-rate revenues by 2028; the acquisition of Woolf puts us right on pace to achieve this goal and we will continue to evaluate additional acquisition opportunities going forward; as one of the largest distributors of architectural building products in North America with approximately 6% market share, there remains significant opportunity for growth and we maintain a robust pipeline of acquisition targets; over the longer term our business is supported by strong end-market fundamentals, including historic under-building of homes, positive demographic factors, strong home equity, and an aging housing stock; decreases in interest rates could further support end-market demand for our products; we continue to see a multi-year runway for growth in our core repair and remodel, residential, and commercial markets; Excessive Interest and Financing Expenses Limitation ("EIFEL") legislation which limits our ability to deduct interest and increases our expected taxable income in Canada; during the quarter ended June 30, 2024, we recognized $4.3 million (C$5.8 million) of deferred tax assets based on the expected utilization of operating loss carry forwards; quarter-to-quarter comparisons of our financial results are not necessarily meaningful and should not be relied upon as an indication of future performance; historically, the first and fourth quarters can be seasonally slower periods for our business; in addition, net earnings reported in each quarter may be impacted by acquisitions, foreign currency fluctuations, and changes in customer buying patterns, sales force, competition, pricing inputs, and supply constraints; our business requires an ongoing investment in working capital which we consider to be comprised of accounts receivable, inventory, and prepaid expenses, partially offset by short-term credit provided by suppliers in the form of accounts payable and accrued liabilities; our investment in working capital may fluctuate from quarter-to-quarter based on factors such as sales demand, strategic purchasing decisions taken by management, and the timing of collections from customers. Historically, the first and fourth quarters can be seasonally slower periods for construction activity, resulting in reduced demand for architectural building products; our debt management strategy is to repay a portion of our credit facilities related to acquisitions, and maintain a base level of debt as part of our capital structure; our intent is to roll and renew our credit facilities when they expire; we do not intend to restrict future dividends in order to fully extinguish our debt obligations upon their maturity; the amount of debt that will actually be drawn on our available revolving credit facilities will depend upon the seasonal and cyclical needs of the business and our cash generating capacity going forward; when making future dividend and share repurchase decisions, we will consider the amount of financial leverage, and therefore debt, we believe is appropriate given existing and expected market conditions and available business opportunities; we do not target a specific financial leverage amount; we believe our current credit facilities are sufficient to finance our working capital needs and market expansion strategy; we intend to issue common shares from treasury to settle the portion of the obligation not paid to employees in cash; there are well established legal avenues to appeal Commerce's Final Determination and we intend to vigorously pursue recovery of the duties paid; The appeal process is typically a multi-year procedure, however, and the actual timing and outcome of the appeal is not estimable at this time; while our challenge is pending, we have elected to pay the out of scope notices to avoid interest and penalties; and the timing and outcome of our challenge is not estimable at this time.

The forecasts and projections that make up the forward-looking information are based on assumptions which include, but are not limited to: there are no material exchange rate fluctuations between the Canadian and US dollar that affect our performance; the general state of the economy does not worsen; we do not lose any key personnel; there is no labor shortage across multiple geographic locations; there are no circumstances, of which we are aware that could lead to the Company incurring costs for environmental remediation; there are no decreases in the supply of, demand for, or market values of our products that harm our business; we do not incur material losses related to credit provided to our customers; our products are not subjected to negative trade outcomes; we are able to sustain our level of sales and earnings margins; we are able to grow our business long term and to manage our growth; we are able to integrate acquired businesses; there is no new competition in our markets that leads to reduced revenues and profitability; we can comply with existing regulations and will not become subject to more stringent regulations; no material product liability claims; importation of components or other innovative products does not increase and replace products manufactured in North America; our management information systems upon which we are dependent are not impaired; we are not adversely impacted by disruptive technologies; an outbreak or escalation of a contagious disease does not adversely affect our business; and, our insurance is sufficient to cover losses that may occur as a result of our operations.

The forward-looking information is subject to risks, uncertainties and other factors that could cause actual results to differ materially from historical results or results anticipated by the forward-looking information. The factors which could cause results to differ from current expectations include, but are not limited to: exchange rate fluctuations between the Canadian and US dollar could affect our performance; our results are dependent upon the general state of the economy; the impacts of COVID-19, further mutations thereof or other outbreaks of disease, could have significant impacts on our business; we depend on key personnel, the loss of which could harm our business; a labour shortage across multiple geographic locations could harm our business; decreases in the supply of, demand for, or market values of hardwood lumber or sheet goods could harm our business; we may incur losses related to credit provided to our customers; our products may be subject to negative trade outcomes; we may not be able to sustain our level of sales or earnings margins; we may be unable to grow our business long term or to manage any growth; we are unable to integrate acquired businesses; competition in our markets may lead to reduced revenues and profitability; we may fail to comply with existing regulations or become subject to more stringent regulations; product liability claims could affect our revenues, profitability and reputation; importation of components or other innovative products may increase, and replace products manufactured in North America; disruptive technologies could lead to reduced revenues or a change in our business model; we are dependent upon our management information systems; disruptive technologies could lead to reduced revenues or a change in our business model; our information systems are subject to cyber securities risks; our insurance may be insufficient to cover losses that may occur as a result of our operations; an outbreak or escalation of a contagious disease may adversely affect our business; our credit facility affects our liquidity, contains restrictions on our ability to borrow funds, and impose restrictions on distributions that can be made by us and certain of our subsidiaries; the market price of our Shares will fluctuate; there is a possibility of dilution of existing Shareholders; and, other risks described in our Annual Information Form, our Information Circular and in our MD&A.

Our Growth Strategies

Leveraging our platform in multiple areas…

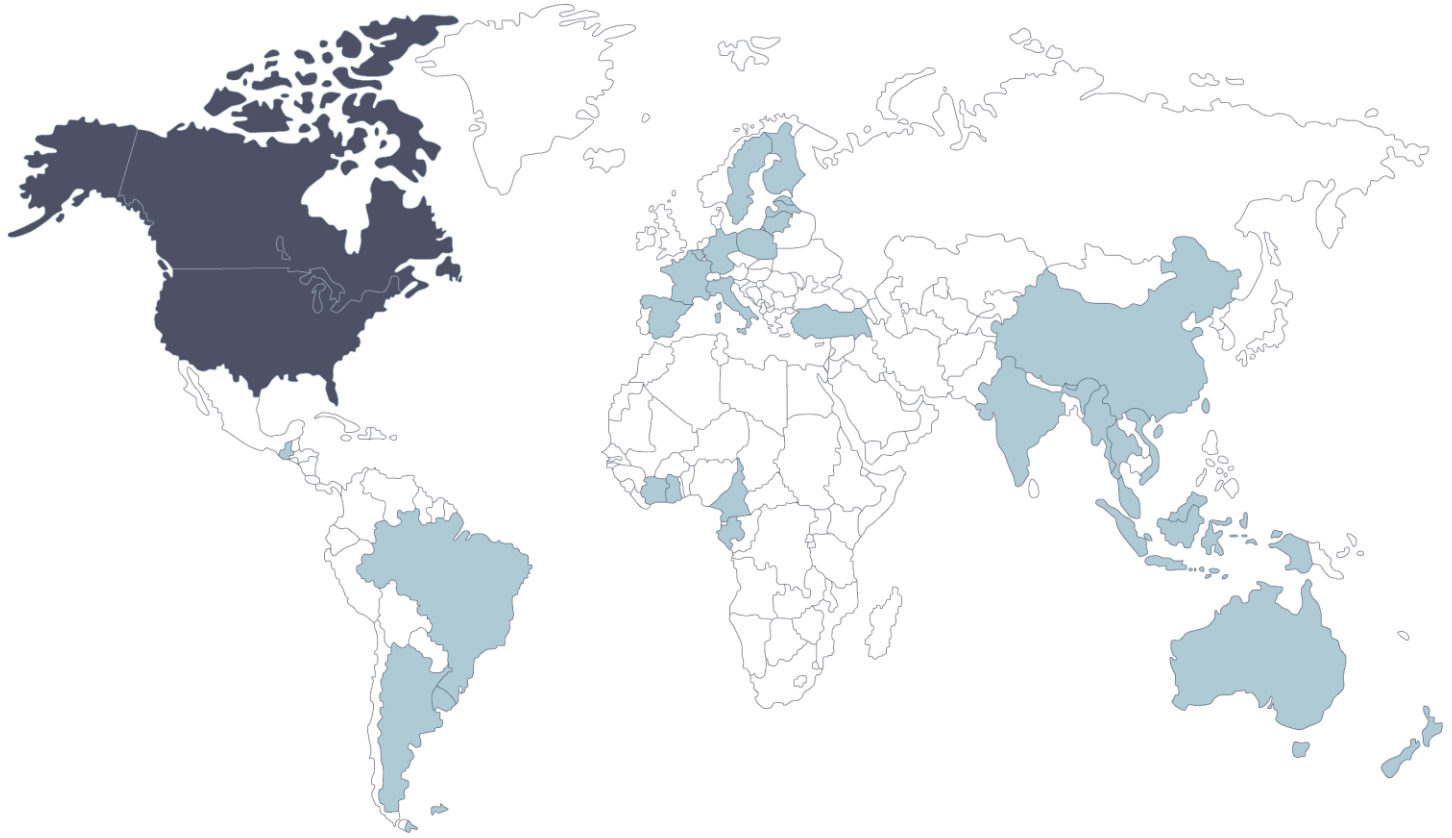

Expanding our product offerings
Growing share with existing customers
Capturing market share
Executing on acquisitions

…To create and sustain our competitive advantage

Global Sourcing from over 30 Countries

Global sourcing is a core competency and a sustainable advantage for ADENTRA

- **One-stop importer** that creates value for vendors
- **We find global supply options** that meet customers' specific needs
- We can **create in-house brands** for certain products
- As a direct importer, ADENTRA **deals directly with major shipping companies**
- **Ability to optimize freight solutions** across carriers and between containers and breakbulk captures incremental margin for ADENTRA

Our diversified supply chains span the globe

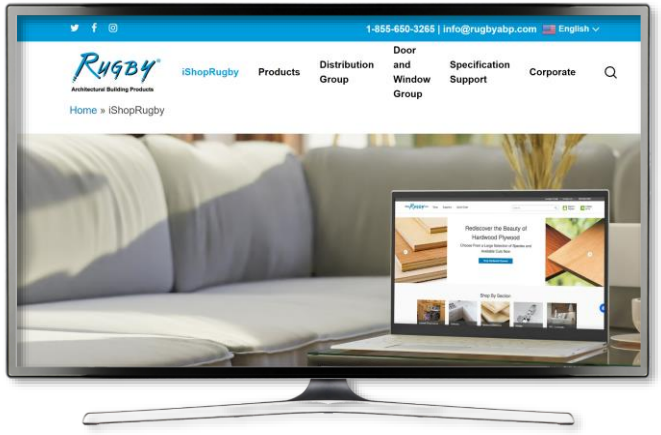

Leading the Digital Customer Experience

Historic Industry Model

- The architectural building products industry has been slow to adopt E-commerce
- Generally, the selling process utilizes salespeople calling on customers

Future Business Model: Full Digital Engagement with Customers

- Customers now expect E-commerce sites to conduct product research and place orders
- Clients benefit from:
  - 24/7 access with full product visibility
  - Streamlines customer workflow
  - Fast quoting, easy re-order
  - Full tracking capabilities and omnichannel notification
  - Same or next-day delivery

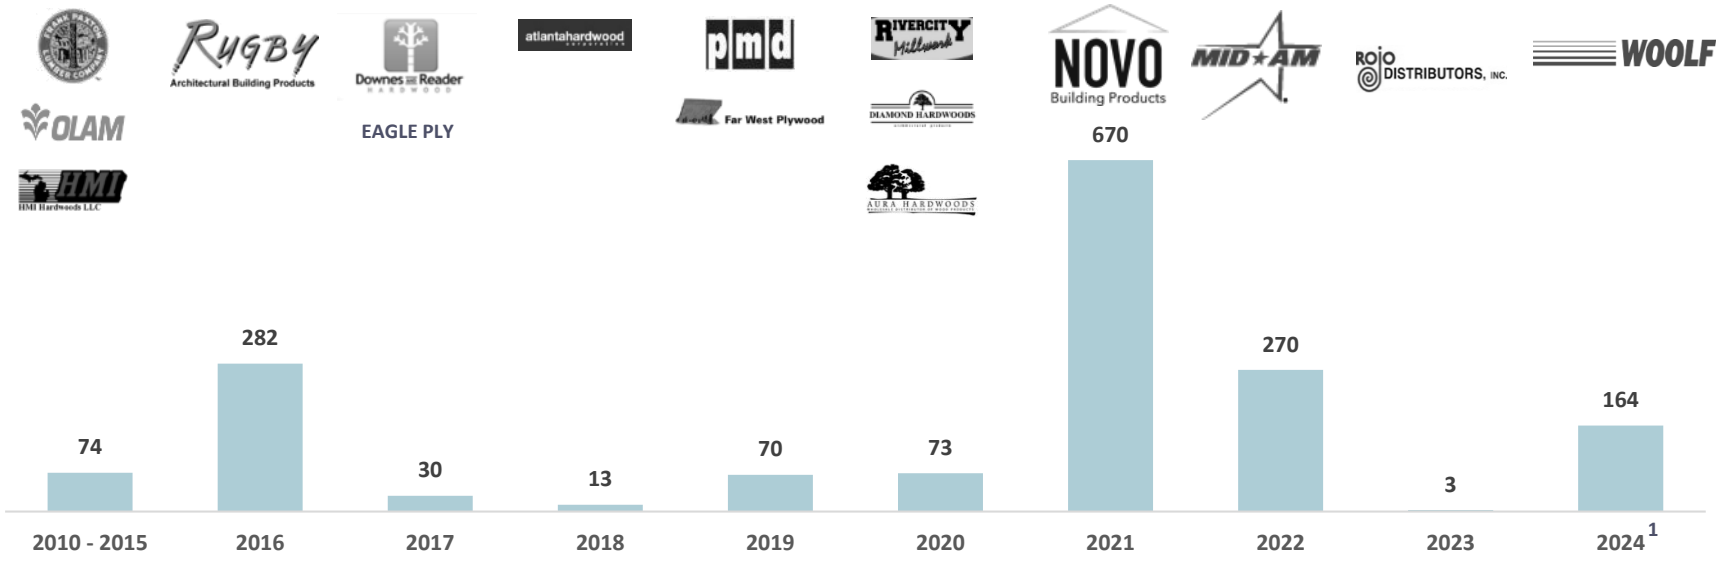

- Comprehensive digital engagement and adoption is driving multiple benefits for ADENTRA:
  - Digital engagement strengthens customer loyalty
  - Product visibility supports larger order sizes
  - Increased margins through better pricing control
  - Creates internal capacity and efficiencies

Represents ~20% of sales, and growing

Demonstrated Growth Through Acquisition

Track Record – Sales Acquired (US$ millions)

Significant market share available in a highly fragmented industry

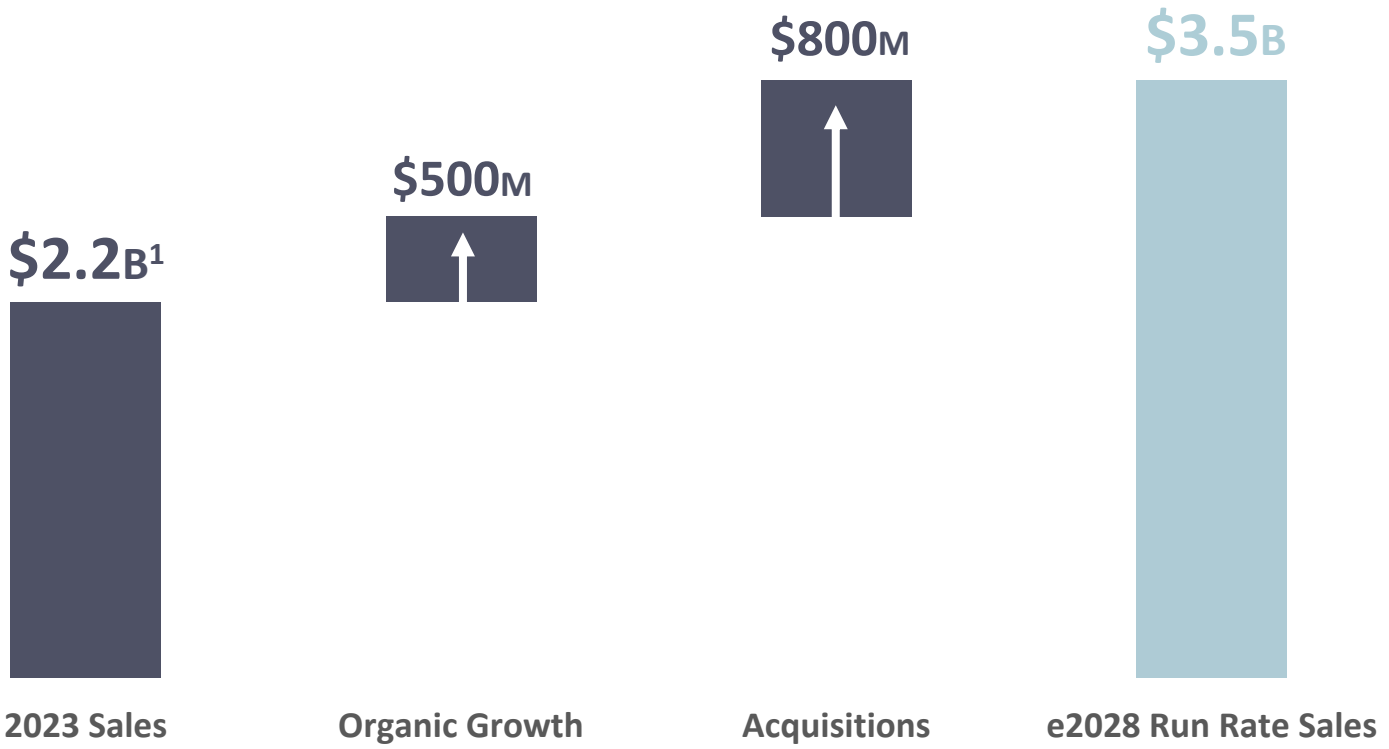

Clear investment criteria

- Architectural products in adjacent/complimentary categories
- Primary focus on distribution, complemented by value-added light manufacturing
- Enhanced access to high-value end markets in the U.S.
- Accretive to per-share earnings and free cash flow

ADENTRA's platform captures significant synergies as acquisitions are integrated, increasing the acquiree's EBITDA margin over time

Focused on delivering profitable growth and creating shareholder value

ADENTRA

1. Sales CAGR is calculated on sales growth over the period 2024 – 2028.
2. "Gross Margin" and "EBITDA Margin" are calculated as follows: Gross Margin = gross margin / sales; EBITDA Margin = Adjusted EBITDA / sales.
3. ADENTRA calculates "Leverage" as Net Debt / Adjusted EBITDA after rents. Additional details on the Company's calculation of Leverage can be found in its financial disclosures.
4. Return on Invested Capital (ROIC) calculated as Adjusted EBITDA less taxes, depreciation and amortization, divided by the sum of net debt plus equity.
5. "Adjusted EBITDA" is a non-IFRS measure. Please see "Non-IFRS and Other Financial Measures" on slide two.
