

NEWS RELEASE

United States Marine Corps Purchases 908 Devices' XplorIR Gas Identification Devices

2025-10-16

BOSTON--(BUSINESS WIRE)-- **908 Devices Inc.** (Nasdaq: MASS), a pioneer of purpose-built handheld devices for chemical analysis, announces that the United States Marine Corps CBRNE Installation and Protection Program purchased 17 of the company's **XplorIR** devices for the chemical identification and quantification of hazardous gases and vapors.

The program's mission is to support federal firefighters, military police, post offices and security augmentation forces with CBRNE (Chemical, Biological, Radiation, Nuclear and Explosive) and hazardous materials equipment, training and support. Its purpose is to protect Marine Corps installations and the people on them from CBRNE terrorism and hazardous materials incidents.

The XplorIR devices will be deployed at installations within the United States and overseas. The U.S. Marine Corps CBRNE-IPP is an early adopter of the company's MX908 handheld mass spectrometry device for trace-level chemical identification and is now adopting the XplorIR for identification of bulk gases.

The handheld XplorIR device rapidly detects, identifies, and quantifies more than 5,000 unknown gas and vapor chemical threats, including complex mixtures, at the point of need. Samples can be wirelessly uploaded to the 908 Devices' Team Leader app for real-time viewing of results from outside the hot zone, enabling informed decisions for a coordinated response. The device has simple controls, an intuitive display and is built for harsh environments, making it easy for first responders to use in emergency situations.

[About 908 Devices](#)

908 Devices is revolutionizing chemical analysis with its simple handheld devices, addressing life-altering applications. The Company's devices are used at the point-of-need to interrogate unknown and invisible materials and provide quick, actionable answers in vital health, safety and defense tech applications, addressing the fentanyl and illicit drug crisis, toxic carcinogen exposure, and global security threats. The Company designs and manufactures innovative products that bring together the power of complementary analytical technologies, software automation, and machine learning. Forward Looking Statements for 908 Devices

This press release includes "forward looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts are forward-looking statements, including, without limitation, statements regarding the expected uses and capabilities of the Company's products. Words such as "may," "will," "expect," "plan," "anticipate," "estimate," "intend" and similar expressions (as well as other words or expressions referencing future events, conditions or circumstances) are intended to identify forward-looking statements. These forward-looking statements are based on management's current expectations and involve known and unknown risks, uncertainties and assumptions which may cause actual results to differ materially from any results expressed or implied by any forward-looking statement, including the risks outlined under "Risk Factors" and elsewhere in the Company's filings with the Securities and Exchange Commission which are available on the SEC's website at www.sec.gov. Additional information will be made available in the Company's annual and quarterly reports and other filings that it makes from time to time with the SEC. Although the Company believes that the expectations reflected in its forward-looking statements are reasonable, it cannot guarantee future results. The Company has no obligation, and does not undertake any obligation, to update or revise any forward-looking statement made in this press release to reflect changes since the date of this press release, except as may be required by law.
